

Build your Wi-Fi network with the UniFi® Secure High Density Access Point, part of the Ubiquiti® UniFi Enterprise System. With an aggregate radio rate of over 2.5 Gbps, the UniFi SHD is an indoor/outdoor, 4x4 MU-MIMO 802.11ac Wave 2 dual-band access point supporting over 500 concurrent users. Engineered from the ground up for superior network security, the UniFi SHD features unparalleled Wi-Fi security utilizing a dedicated security radio with persistent threat management.

Features

- Dedicated Security Radio with Persistent Threat Management
- Simultaneous Dual-Band 4x4 Multi-User MIMO
- 5 GHz Band with Radio Rate of 1.7 Gbps
- 2.4 GHz Band with Radio Rate of 800 Mbps
- Four-Stream 802.11ac Wave 2 Technology
- Supports 500+ Concurrent Users
- Powered by Gigabit 802.3at PoE+
- Managed by UniFi Network Software and Mobile App

Package Contents

- (5) UniFi SHD Access Points
- (5) Ceiling/Wall Mounting Kits
- Quick Start Guide

Easily deploy and manage your UniFi Enterprise System using the included UniFi Network software. Real-time status, automatic UniFi device detection, DPI analytics, predictive coverage, hotspot setup, and advanced security options are all seamlessly integrated in the intuitive, graphical UI. With the UniFi Controller, you can manage and provision thousands of UniFi devices over multiple sites. Scale up your network as needed without any ongoing licensing fees or costly hardware controllers.

We recommend using a UniFi PoE Switch to power your access points.
Available in 8, 16, 24, and 48 port versions.
