

STREX

With the Strex ULTRA HD Wildlife Camera you can spot wild animals, keep a close eye on the surrounding area and enjoy 24/7 surveillance! With motion detection, night vision, audio recordings and a lightning-fast shutter speed, this multifunctional wildlife camera really has it all.

You can watch all the captured images and videos using the integrated LCD screen. Of course it is also possible to view everything on the computer using the microSD card or USB cable. Mount the camera around a tree using the mounting strap or hide it in a well camouflaged area and enjoy unique footage.

Whether you place it in the woods, a hunting field or your backyard: your new wildlife camera shoots razor sharp pictures
