Product Parameters

Item：Q1
Input：DC5V=0.5-1.0A
Power：1W（Max）
Batterycapacity：polymer battery-800mAh
Chargiong Crcles：500
Operating time：50h
Charging time：1h
product weight :100g
Product color：White
Product size：80*80*33mm
Place of Origin：China

Instructions for Use

1.This product is provided with total 5 mute keys: Close key (include Play/Pause functions), timer key, light key, previous song key (press and hold key for volume down), Next song key(press and hold button for volume up).

2.Hypnotic music has total 9 songs: white noise, sea waves, crickets sound, rain sound, forest birds sound, streams sound, 3 songs of cradles.

3.Light key: It still works even without pressing open key.

4.Press and hold the open key for 0.5 seconds then open, play a piece of music after open, press and hold the key for short time then pause. Music can be circularly played and the music can be shifted by pressing and holding previous/next key for short time, press and hold key for volume up and down.

5.Memory function: Which one to play when the device is turned off, and the next time it starts, it automatically plays the music on the last shutdown.

6.Press the light key and divide it into six cycles, one cycle from 10 minutes to 0, the countdown begins at 10 minutes, and the breathing rhythm slows down gradually at 10 minutes. When light is on, it means inhalation, when light becomes weak, it means exhalation, guide breathing, this function automatically timed 1 hour off, in the absence of timing function, if the timing function is turned on, it will set time.

7.Time key: Press the first 15 minutes (bright red LED), the second 30 minutes (bright green LED), the third 60 minutes (bright blue LED), and then the fourth turn off time.

8.Charging State:
When USB is inserted, the first red light flashes when the power is below 30%, and the other lights are not lit.When the charge is charged between 30% and 60%, the first red light will turn solid and no longer blink, and the second green light will flash.When the battery is charged to between 60% and 100%, the red light will turn solid and no longer blink, and the third blue light will flash.When the power reaches 100%, all three lights are on, which proves that the battery is fully charged.Unplug the USB charging cable when fully charged.

9.Notes: For safety, it will not work when charging.
