

# Electronic thermometer user manual

## \* product specifications / basic functions

This product is the size of 81mm \* 71mm \* 10mm

Screen: 3.2 inch screen

Configure a bracket with built-in batteries

Precise clock oscillator

The 12 hour clock (AM for the morning session, PM for the afternoon session)

Temperature / humidity automatic update display

Temperature measuring range: - 10 DEG C ~ 88 DEG C

Temperature measurement accuracy: + 1 ~ C (1.8 ~ F)

Temperature resolution: 0.1 degrees C (0.2 degrees F)

Humidity measurement range: 10%RH-99%RH

Humidity measurement accuracy: + 5%RH

Humidity resolution: 1%

The use of CR2032 3V battery

## \* operation method

According to the surrounding environment, temperature sensors and humidity sensors automatic real-time detection, data display for every 10 seconds or so, check and refresh, The clock icon for the screen display, time can be set free, the product side there is a time key, flashing by 1 hour, you can set the hour long press fast forward, set for 5 seconds after the automatic jump into minute flashing, to set minutes, press the fast forward, automatically enter the normal state set for 5 seconds after.
