The juice pack air

Made for iPhone 4 User Manual

Features

The mophie juice pack air extends the battery life of your iPhone for hours and provides a comfortable ergonomic design with the complete protection of a hard shell case.

Here's a rundown of why the juice pack air is so fantastic:

1. (Take a breath) Ergonomic, form-fitting, fully protective impact-resistant case-and-battery-in-one for iPhone.
2. Integrated power switch allows you to put the juice pack air in standby mode. Only use the battery when you need it. In standby mode (red), the juice pack air still allows charge and sync capabilities through the micro-USB port and still offers the complete protection of a case.
3. Uses breakthrough rechargeable lithium polymer battery. (Much safer than those troublesome lithium-Ion batteries).
4. State-of-the-art battery technology extends the life of your iPhone for hours... and you can even recharge it while it's still connected to the iPhone! This battery rocks.
5. Track battery power status at a glance with an integrated 4-light LED status indicator. Indicates charging mode and current battery life. Know before you go!
6. It's the included USB micro cable connection that allows you to charge and sync your iPhone while refilling your juice pack at the same time. Really, you don't ever have to disconnect the juice pack, though it's a snap when you do.
7. Rechargeable for over 500 cycles. (These are FULL cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way ten times before you get to a complete cycle. Don't be afraid to top it off.)
8. Smart battery technology actually instructs the iPhone to drain out the juice pack first. When you're done with the juice pack you can pull it off and still have a fully charged iPhone.
9. The juice pack air offers complete protection from top to bottom. No more choosing between protection and power.
10. Built-in short circuit, over-charge and temperature protection. Safety First!

Compatibility

Though the juice pack air for iPhone 4 comes with a standard iPod/iPhone connection pin, this battery is intended solely for use with the Apple iPhone. 4. Please do not attempt to use the product with any other device - things could go haywire, but contact us if they do.

Charging your juice pack air

Connect the juice pack to a power source using the micro USB cable that came with your juice pack. The USB cable can be plugged in to your computer or any "Made for iPhone" wall-plug style power source with USB out including the standard iPhone USB wall adaptor. (The LEDs located on the back of the device will blink when charging, as the juice pack becomes more charged the LEDs will indicate how full it is, but one LED will remain blinking until completely full.)

Important

The juice pack air comes charged and ready to go, but after the initial use, normal charging will take only 2 to 3 hours for maximum power – AND you can then charge it while the iPhone is inserted or separately.

Charging your iPhone 4 using the juice pack air

If your iPhone is drained of power or if you want to extend the battery life of your iPhone, simply slide the iPhone into the juice pack air. Make sure that the pin connector is securely inserted into the bottom of the iPhone and the switch is turned On (green). When the iPhone recognizes the juice pack, a battery symbol will appear on the screen and you will hear a chirp from the iPhone, this indicates that the iPhone is charging and/or using the power from the juice pack rather than from the iPhone itself.

If your iPhone is drained of power, the juice pack will first charge your iPhone. If your iPhone is fully charged, the juice pack will act as your primary battery and no power will be lost from the iPhone internal battery until the juice pack is depleted. So you keep on talkin', rockin', surfin' and sendin'!

Checking the status of the juice pack air

You are always in the KNOW! To check the battery status of the juice pack, press the button located on the bottom of the device. When pressed, the LED lights will illuminate for several seconds. Four LEDs means that the juice pack is fully charged, and one LED means that it is almost empty.

Stand-by mode

If you'd rather use your internal battery and not the juice pack, use the switch on the lower-left corner of the juice pack, to put it into stand-by mode. The dot near the switch will indicate whether the juice pack is in stand-by mode (red) or charging mode (green). When your internal battery is low, simply flick the switch On and your iPhone will begin charging immediately.

***Note:** Using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge.

Sync with your computer without removing

While connected to the juice pack air, you can still sync your iPhone with a computer. Simply connect the included micro USB cable from the juice pack air to the computer and sync your iPhone the same as if it was directly connected.

To keep your juice pack air operating to its fullest potential, make sure to do the following:

1. Keep your juice pack dry and away from moisture and corrosive materials.
2. Do not wash the juice pack with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.
3. Re-charge your juice pack once every three months when not in use, and remember to charge it for one hour before putting it away the first time.

Warranty

At mophie, we are dedicated to making the best quality products we can. To back this up, your juice pack is warranted for 1 full year from the date of purchase. Be sure to register your product at mophie.com to activate it and check for the latest product updates as they develop.

Warning

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you ("Purchaser"), and not mStation or mophie (collectively "Manufacturer") are responsible.

⚠ Do not store battery in high temperature environment, including intense sunlight heat. Do not place battery in fire or other excessively hot environments.

⚠ Be cautious of excessive drops, bumps, abrasions or other impacts to this battery. If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion, due to any cause, discontinue use and contact manufacturer or dispose of it in an appropriate manner at your local battery recycling center.

⚠ Do not disassemble this battery or attempt to repair or modify it in any manner.

⚠ Do not expose this battery to moisture or submerge it in liquid. Keep battery dry at all times.

⚠ Do not attempt to charge battery using any method, apparatus or connection other than the device's USB connector. For questions or instructions for the various ways to charge the juice pack refer to this manual's "Charging your iPhone 4 using the juice pack" and "use summary" sections.

⚠ Do not attempt to replace any part of this battery.

⚠ If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.

⚠ All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abraded, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.

⚠ For extended storage, first charge your battery for one hour.

⚠ Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

Legal

This Battery is meant for use only in conjunction with the appropriate mobile entertainment device. Please consult your device packaging to determine whether this Battery is compatible with your particular mobile entertainment device. Manufacturer is not responsible for any damages to any mobile entertainment device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this Battery in conjunction with any device or accessory other than the appropriate mobile entertainment device for which this battery is designed. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

CAUTION: To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device is comply with Class B limits. All peripherals must be shielded and grounded. Operation with non-certified peripherals or non-shielded cables may result in interference to radio or reception.

MODIFICATION: Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the device.

FAQ

What are the best methods for charging my juice pack air?

Connect the mophie juice pack to a power source using the USB cable that came with your juice pack. The USB cable can be plugged in to your computer or any "Made for iPhone" wall-plug style power source w/ USB out.

Is the juice pack air for iPhone 4 compatible with any previous generation iPhone?

No, This juice pack air is only compatible with iPhone 4.

How many charge cycles do you get in the juice pack air?

The juice pack air is rechargeable for over 500 cycles (These are full cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way 10 times before it counts as a complete cycle.) Don't be afraid to top it off!

What are the benefits of switching the juice pack air to stand-by mode?

Using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge.

Can I sync my iPhone while the juice pack air is still connected?

You can charge and sync your iPhone to iTunes without removing it from its juice pack via the included micro USB cable.

What is mophie's return policy?

mophie reserves the right to claim a 20% restocking fee upon return. (For a full "Return Policy", please go to mophie.com)

Will I always receive double the battery life with my juice pack air?

We cannot guarantee that you will receive double the battery life. The amount of additional battery you will receive depends on a variety of factors that are different for every user.

Does the juice pack air block the speaker, microphone or cameras?

Of course not! In fact, this juice pack air redirects sound from the bottom of the iPhone 4 to the front, resulting in a richer, fuller sound quality.

Does the juice pack air interfere with antenna reception?

Embedded electronics results in no signal interference with the iPhone 4.
