

SOCKET PROTECTOR INSTRUCTION SHEET

Socket Protector is used on the outlet plug. It can prevent your child from the danger of touching with outlet plug by hand. No need and drill and tool, no need to remove when no use.

INSTALLATION:

Peel off the backing paper from the adhesive tape , insert and stick the protector into outlet plug in the right position. When you use the plug, no need remove the protector from outlet , just rotate the plug . After you use the plug, pull out the plug from the outlet, the protector rotate automatically, very convenient.

Warning:

1. This Sockets protector is just a protector, so it cannot substitute for the adult supervision.
2. It is not a toy, so do not give it to your little child to play with
