

## Tips for Battery

- 1 Please prepare 3pcs good quality AAA batteries, otherwise will influence the brightness and using time.
- 2 Press the button "W" to check if all LED bulbs are showing white color, whichever brightness is darker, it means the light batteries are in low power, lower power will weaken the sensitivity of remote. If the light keep flashing red light, it means the batteries will run out of power soon, please change new batteries.
- 3 If you don't use for a long time, please remove the batteries, it will help to save power and protect the lights.
