

An advertisement for the Intex PureSpa hot tub. The hot tub is a large, dark-colored inflatable with a white interior, situated on a light-colored tiled patio. A woman in a black swimsuit is sitting on the edge of the tub, and a man is partially visible inside. The background features a glass railing, lush greenery, and a scenic view of a valley and mountains under a dramatic, cloudy sky at sunset or sunrise. The Intex logo is in the top right, and the product name and year are at the bottom right.

Fiber-Tech™ Technology provides the ultimate comfort and support.

Conventional Inflatable Spa

Introducing Fiber-Tech® Technology, designed to offer superior structural stability while maintaining a comfortable surface for a luxurious and refreshing spa experience.

POWERFUL AND SAFE HEATING SYSTEM

The Positive Temperature Coefficient (PTC) heater is designed to maximize heat transfer to the water, while ensuring the highest level of safety, performance and longevity.

HARD WATER TREATMENT SYSTEM

Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system.

The system generates an electro-magnetic field that agitates calcium and other minerals in the water, causing them to create suspended crystals.

Hard water build up limits water flow and reduces the life of your spa.

The suspended crystals of hard water elements are retained in the filter cartridge, leaving soft water in the spa.

HYDRO AERATION TECHNOLOGY™

Intex is proud to bring you a new level of relaxation and water purity, by bringing revolutionary water aeration techniques into your backyard portable hot tub.

IMPROVED WATER CIRCULATION

Hydro Aeration Technology enhances filtration efficiency. Fine particles clump together and settle to the bottom of the spa during the aeration process, making it easier to remove and filter particles through the filtration system. Improved filtration and circulation create a cleaner, healthier, and more refreshing spa experience.

INCREASED NEGATIVE IONS AT WATER SURFACE

The aeration process increases negative ion concentration. Increased negative ions have been proven to improve the air freshness around the spa as it removes air pollutants and neutralizes free radicals that affect air quality.

ENHANCED POWERFUL AND SOOTHING BUBBLE JETS

By mixing air with water, the total volume of bubbles is increased to give you a more vigorous and soothing massage.

PureSpa™
an Intex® brand

JET & BUBBLE DELUXE

The PureSpa™ Jet & Bubble Deluxe Spa combines the pleasures of a high performance jet massager and a bubble massage spa in one luxurious setting. High-performance engineering and Hydro Aeration Technology make the PureSpa™ Jet & Bubble Deluxe Spa the gold standard in luxury spas. Intex's Saltwater Sanitation and Hard Water Treatment systems, as well as the Intex Link™ Spa Management App, come standard and ensure an effortless spa experience.
