

Amber Setup Guide for:

AC2600 Router

Amber OS

Physical Set up - Cable Setup

Connect WAN Cable

Standalone Modem

- 1. Connect modem WAN port to Amber's WAN port (Blue).
- 2. Please reset your Modem. To reset modem, you can either unplug power cable for 10-20 seconds and plug back in or by pressing reset button on the back for the device for 10 seconds.

Modem with built-in-router

- 1. If you use a modem with built-in router, connect Amber LAN port to the router's network (LAN) port.
- 2. Please reset your modem with built-in-router. To reset modem with built-inrouter, you can either unplug power cable for 10-20 seconds and plug back in or by pressing reset button on the back for the device for 10 seconds.

Computer Set Up:

Connect PC LAN to Amber LAN port

Power up your Amber:

Insert power cable then press power button.

Amber Wi-Fi Router Setup

Now that we have completed the physical set up, we will continue with the AC2660 set up, so please follow instructions.

 Open your browser and go to the <u>http://latticerouter.local/.</u> You can as well access router gateway from Https://192.168.01.

2. Select "Detect Connection Type" if you do not know the settings provided by yout ISP.

Note: Manual set up is recommend for experienced users.

3. You will be promoted to use DHCP, please select and continue.
