

For more than 68 years Solotica has been a pioneer in the research and manufacturing of contact lenses made in Brazil. Founded in 1949 Solotica's goal has always been to go above and beyond creating contact lenses. With a strong focus on quality, sourcing the best raw materials and investment in technology and training the company has remained at the forefront of lens technology. Today, Solotica's color contact lenses are known as the world's first most natural looking cosmetic and prescription color contact lenses and worn by celebrities everywhere.

In addition to the experience and recognition of customers and consumers, Solotica has obtained many important certifications internationally and in Brazil, which attest the high quality and safety of our products .

- Certification GMP - ANVISA approval for all the contact lens manufacturing processes.
- Certification ISO 13485: 2003 - Quality system certification.
- Certification CE- approval of the production process of contact lenses.
- **FDA - Food & Drug Administration USA - marketing**
