

# Anna <sup>big</sup>

Fan heater

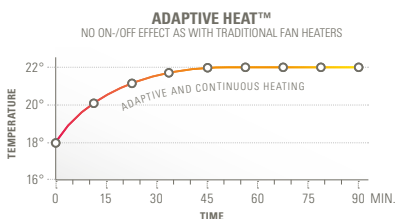

**Stadler Form**<sup>®</sup>  
SWISS DESIGN SINCE 1998

# Anna big — heats the modern way!

Touch panel: adjustable heat output and selectable temperature   2 in 1 heating and breeze mode   8 heat output levels

ADAPTIVE HEAT™ technology automatically adapts heat output in auto mode to reach and keep the desired temperature in an efficient way

The hot heater Anna big combines good looks with unique Adaptive Heat™ technology. With auto mode and a digital thermostat, she quickly and efficiently reaches and maintains the desired room temperature. The eight power levels can be selected simply by tapping on the touch panel. And because Anna big is also big on safety, she has an integrated tilt protection (automatic shut-off) and a modern PTC ceramic heating element (no overheating). Anna big can even be used in the summer: with the heating element switched off, she sends a cool breeze through. Anna big is the intelligent heater for use all through the year.
