

F-170

The fan oscillates about 90 degrees with one simple touch

• Table or clip, easy to use

• Different wind level

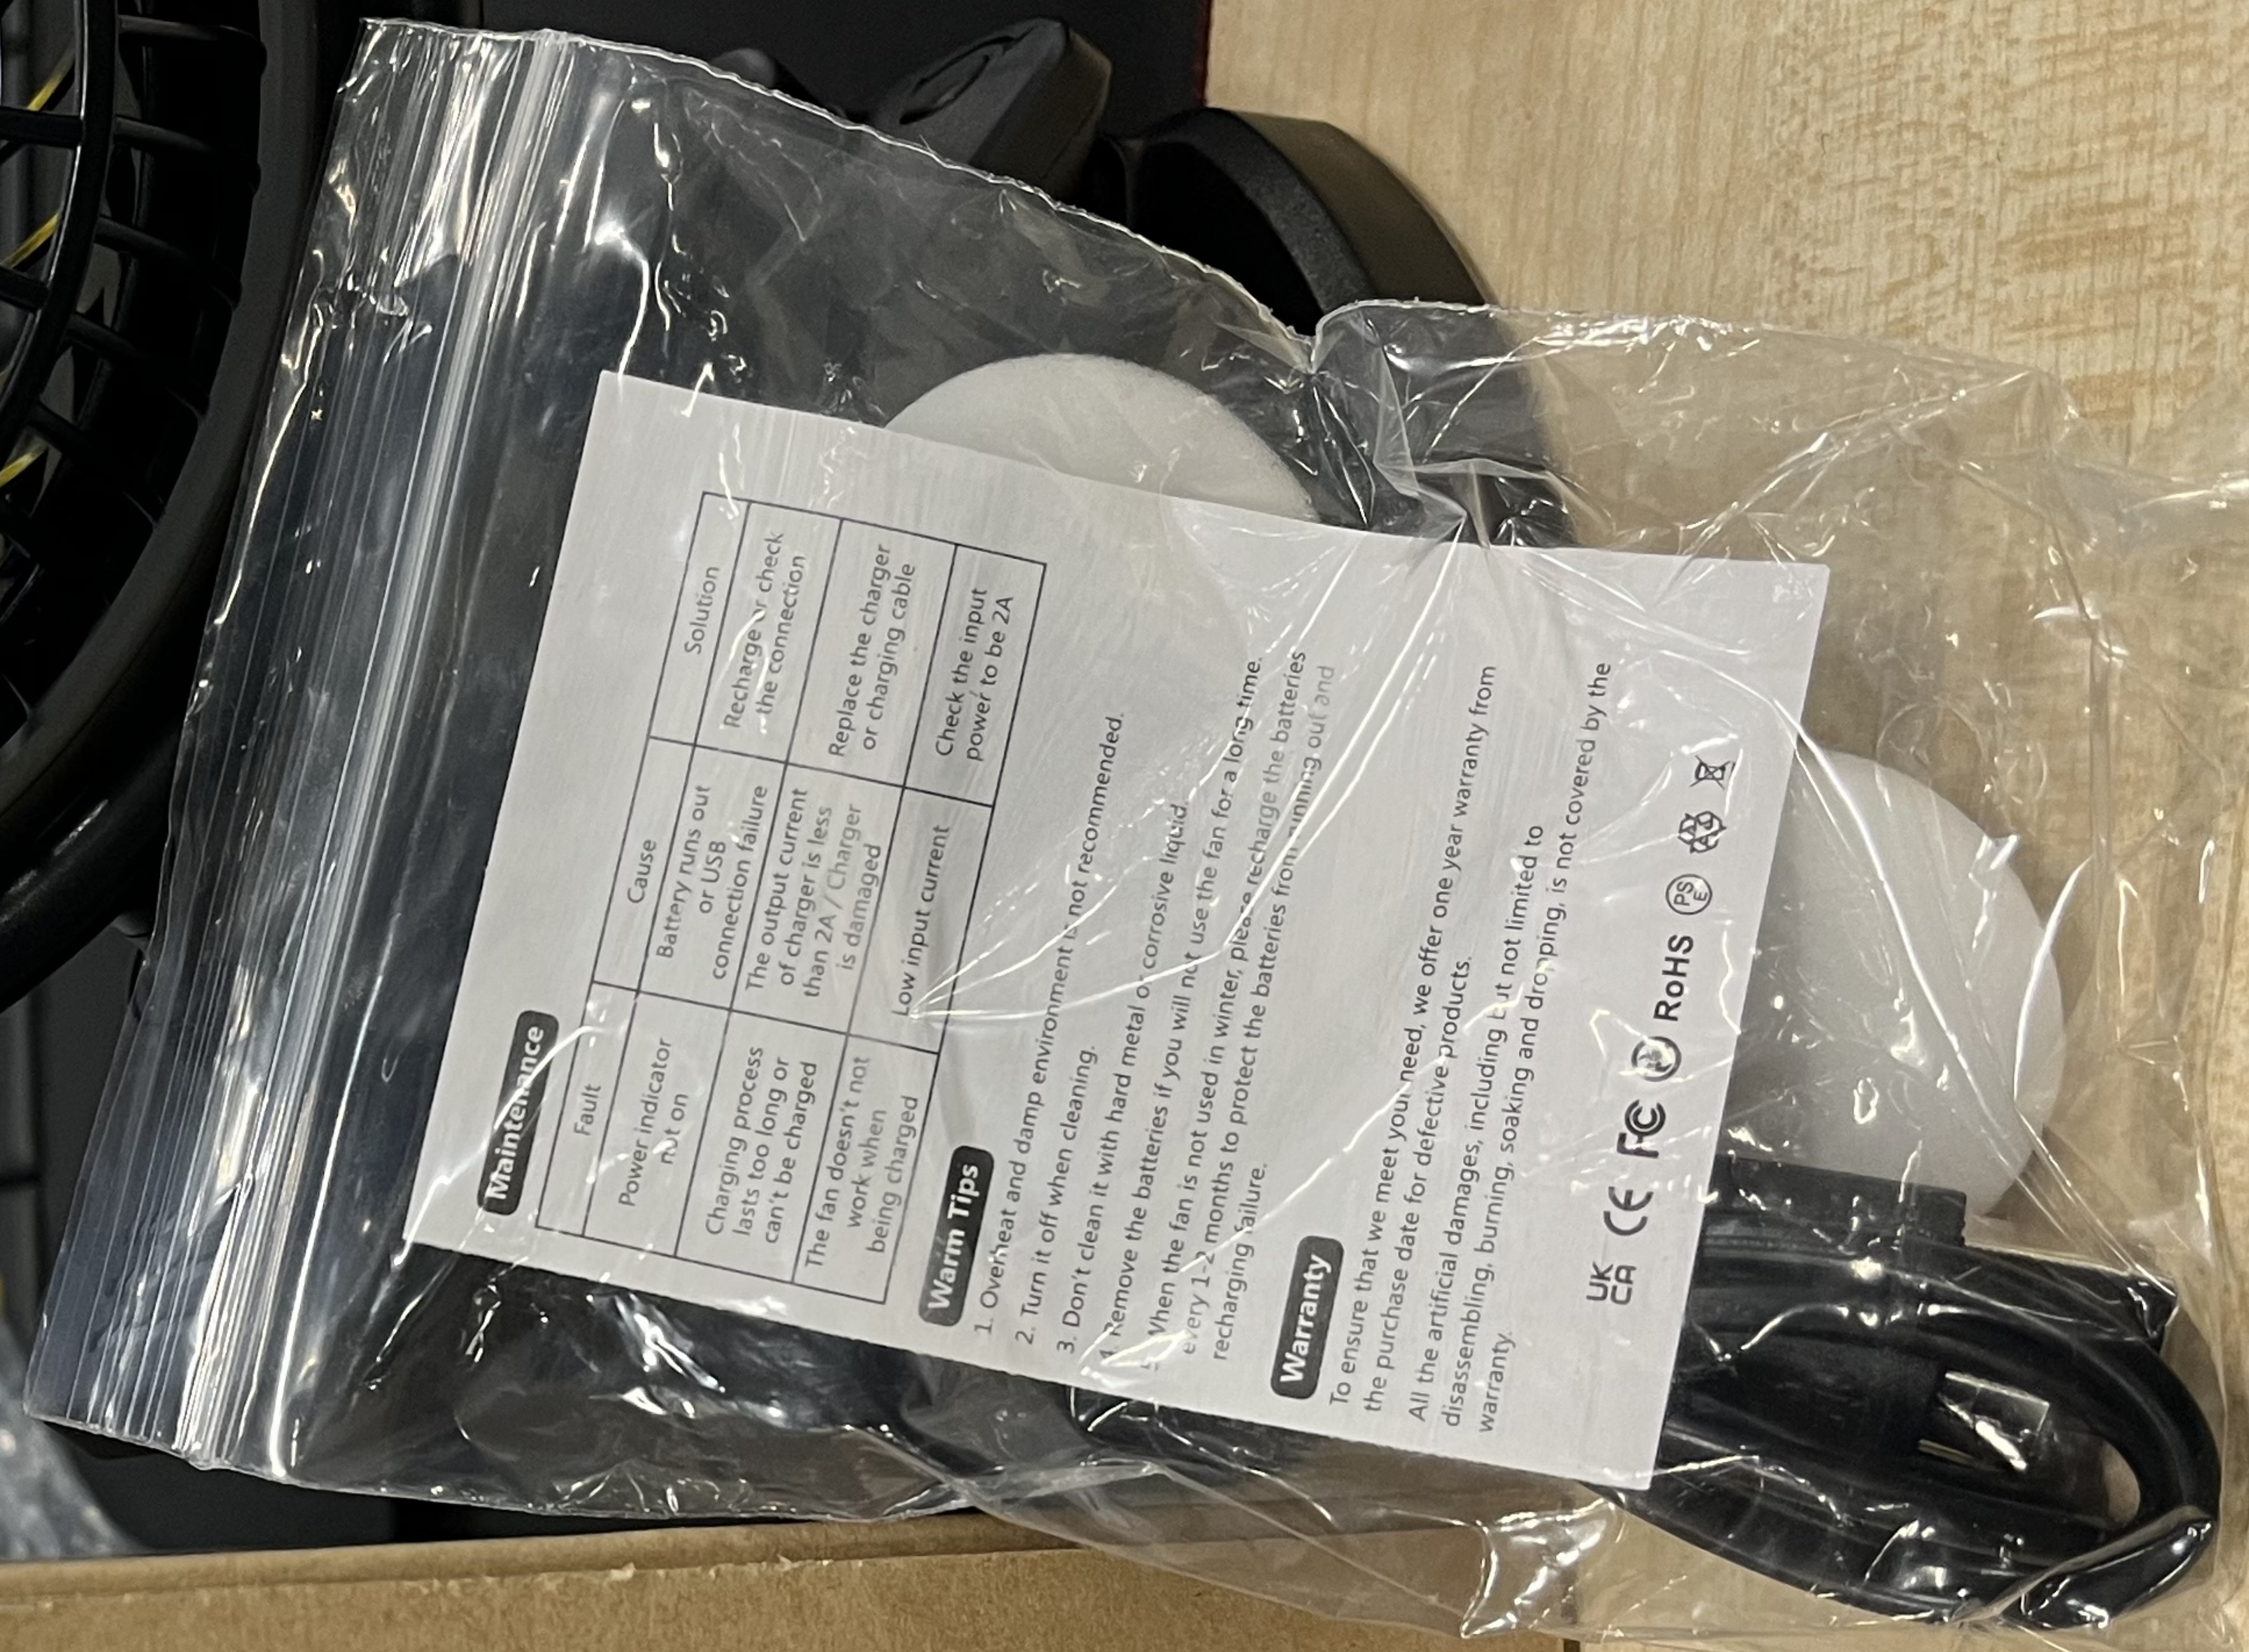

Company Name: Shenzhen Luansheng Electronic Technology Co., Ltd.
Company Address: Floor 3, Haitian Lanyu Technology Industrial Park, No.5 Industrial Road, Shilong community, Shivan Street, Bao'an District, Shenzhen, P.R. China
Executive Standard: Q/LF140 2017

UK CE FC ROHS PS RoHS

株式会社 浩
Made in china

Parameter
Input voltage: DC 5V
Output current: 1.5A
Output power: 3.5W
Executive Standard: ASTM F963/CPSA(US)
仕様
入力電圧: DC 5V
出力電流: 1.5A
出力電力: 3.5W
作業標準: ASTM F963/CPSA(US)
CE FC RoHS PS
Made in China

Maintenance

Fault	Cause	Solution
Power indicator not on	Battery runs out or USB connection failure	Recharge or check the connection
Charging process lasts too long or can't be charged	The output current of charger is less than 2A or Charger is damaged	Replace the charger or charging cable
The fan doesn't work when being charged	Low input current	Check the input power to be 2A

Warm Tips

- Overheat and damp environment is not recommended.
- Turn it off when cleaning.
- Don't clean it with hard metal or corrosive liquid.

Remove the batteries if you will not use the fan for a long time. When the fan is not used in winter, please recharge the batteries every 1-2 months to protect the batteries from running out and recharging failure.

Warranty

To ensure that we meet your need, we offer one year warranty from the purchase date for defective products. All the artificial damages, including L, it not limited to disassembling, burning, soaking and drc'ping, is not covered by the warranty.
