

USB-C Multiport Mobile Adapter

- with USB-C Power Delivery

Connect multiple devices to your smartphone, tablet or notebook and simultaneously charge or power it

CN-392

USB-C Multiport Mobile Adapter - with USB-C Power Delivery

The USB-C Multiport Mobile Adapter turns the USB-C port on your tablet, smartphone or notebook into 4 multifunctional ports. It lets you connect to other devices and charge or power your tablet, smartphone or notebook at the same time.

Use the HDMI port on the USB-C Multiport Mobile Adapter for crystal clear 4K Ultra HD video and connect your headphones (with microphone) to the 3.5mm audio jack. The USB 3.1 Type-A port supports 5Gbps data transfer speeds and 4.5W power. With the 100W USB-C Power Delivery port, that also supports USB 2.0 data, you can charge or power your device while also using the other ports.

The portable, ultra-light aluminum housing was designed to combine perfectly with your iPad Pro (2018), but you can also use the USB-C Multiport Mobile Adapter for other tablets, smartphones (like Samsung Galaxy S10) or notebooks that have a USB Type-C port.
