SAFE SIZING FOR JUVENILE AND SIDEWALK BICYCLES

It is assumed that the bicycle you have bought is sized correctly for the user. Some parents make the mistake of buying a bicycle too large for the intended rider, planning on the child "growing into" it. There should be a minimum of 1 inch clearance above the highest point of the top tube when the child is straddling the bicycle with both feet on the ground (see drawing below).

WARNINGS

Parents/guardians shall take the responsibility to guide and supervise the kids and during the use of the bike to ensure the safety of the kids. Check the bolts and nuts to ensure they are well tightened before each ride. Do not ride on the rough terrain. Make sure that your child always wears an approved bicycle helmet when riding. Do not allow kids to be on busy roads until they are experienced cyclists. Before every ride, check your bike before every ride, make sure that your bike is in safe operating condition. There are potential risks caused by improper use of the bike. Not allow kid to touch the chain/freewheel and chainwheel/cranksets.

Important Information:

PLEASE SIGN FOR THE PARCEL, PLEASE CHECK AND MAKE SURE THE SEALING TAPE IS COMPLETE AND NEW. PLEASE CONTACT THE DEALER IF THE PARCEL IS DAMAGED OR BROKEN.
