

INFRARED THERAPY LAMP

Go for a better life

Treatment guidelines

It is important to use the infrared lamp consistently, we recommend using it at least 5 times a week for 20 to 30 minutes per session. For the best result, please position the infrared lamp about 8 to 20cm (3 to 8 inches) from the spot you want to treat.

Does using an infrared lamp have any side effects?

In numerous clinical studies, red and near-infrared light has been proven to be a safe, natural, and non-invasive treatment. Patients experience less pain, inflammation injuries, and medical procedures. All without the side effects and major health risks you get with prescription pain meds and invasive procedures.
