## 16 Plastic Activity Cards

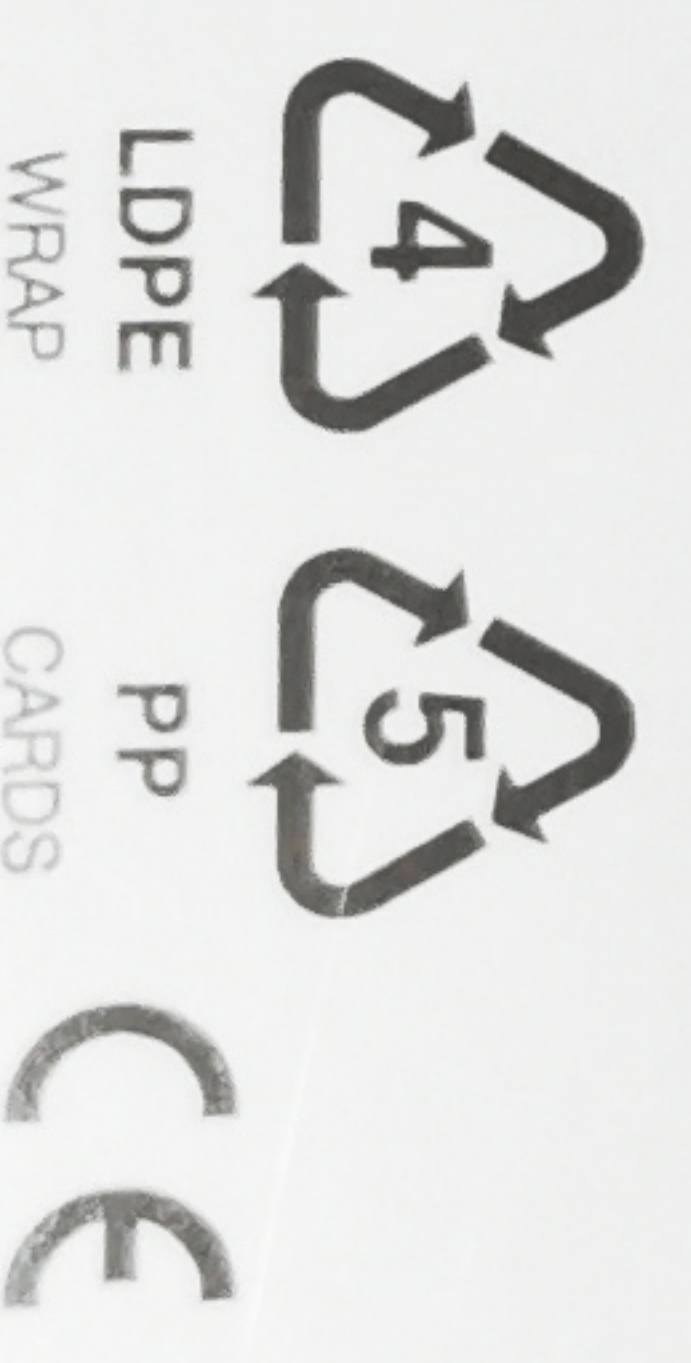

These engaging activity cards have been designed to use with our Pre-coding Penguin Stones. They are an ideal means to help children to think systematically, take logical steps and sequence instructions. These skills can be acquired and consolidated as the children tackle mazes, solve problems and record findings using our wonderful penguin stones with the cards, laying a solid foundation for applying these skills to digital technology. Made from durable plastic, the cards are ideal for use outside.
