

1. Turn the On/Off Switch on the Bluetooth Remote to the "On" position.
2. Turn on your smartphone's Bluetooth function. When you see AB Shutter3 in your list of Bluetooth devices, pair your phone to that device.
3. Once paired, open up the camera feature of your smartphone.
4. Attach your phone to the mount. The smartphone mount can accept phones up to 3.5" wide.
5. To take a picture, press the Shutter Release button. For Apple (iPhones), press the iOS button. For Android phones, press the Android button.

Note: Some Android users may notice the camera zooming when the Shutter Button on the remote is pressed. If this occurs, please go into your smartphone's camera settings and change the "Volume Key" setting to "Camera". Please refer to your smartphone manual for assistance in changing this setting.

Note: You cannot pair more than one remote at the same time.
