

EVOLVE™ OXYGEN

Evolve Oxygen™ is a conveniently sized container of cooled, high-purity, breathable oxygen to aid in the recovery from a variety of physiologically stressed or impaired conditions; to revitalize during periods of physical exertion or mental lethargy, and to stimulate the body at times when peak performance is required.

Why Use Oxygen?

Oxygen is humanity's element of life; without it we are nothing. With a deficiency, we are lethargic and unable to fulfil our potential. With full saturation, we can be mentally and physically alert with a sense of vigour and well-being.

Who Should Use It?

- Athletes - Professional or Amateur
- Fitness enthusiasts
- Skiers/snowboarders
- Hikers
- People affected by pollution
- Singers
- Students
- Seniors
- Sleepy drivers
- Air travellers - Jet lag
- **Anyone short of breath!**

What makes Evolve Oxygen™ special?

Evolve Oxygen™ contains and delivers more than twice the quantity of oxygen compared to all other canned oxygen products. This is because each canister contains activated carbon as an adsorbent, which has a remarkable ability to store oxygen owing to its unique pore structure and high surface area. Derived from sustainable coconut shells, the activated carbon contains tiny micropores on which the oxygen molecules are physically adsorbed by intermolecular interactions known as van Der Waals forces. Activated carbon thus provides a safe and convenient means of storing oxygen that can be easily released when needed.

But the advantages of this system do not end there, because the activated carbon manufacturing process effectively locks away atmospheric carbon dioxide as elemental carbon and prevents its return to the atmosphere. **This enables Evolve Oxygen™, uniquely, to have a negative carbon for an overall positive contribution to the environment.**

Evolve Oxygen™ is a Simply Breathe Brand

How To Use in 4 Easy Steps

1 Remove Packaging

Take the Evolve Oxygen™ canister from the box. Remove the protective, plastic, film ensuring to take care not to damage the can or other components. Recycle the box and protective film.

2 Do Not Remove Plastic Top

Do not remove the plastic top (either inhaler cup or flip-top actuator) from the canister. This could damage and/or break the plastic.

3 Press Button or Trigger

Place the inhaler cup under your nose, and over your mouth. In the case of the flip-top actuator, flick the safety cap to one side, direct the spout towards your mouth and press the button. **Inhale.**

4 Inhale Through Mouth

Once the oxygen is released take a deep breath. To get the most out of your Evolve Oxygen™ canister moderate the flow by using finger pressure and release button/trigger when not inhaling.

Recommended Usage

- 4-8 breaths before or after exercise.
- 2-4 breaths every 20 minutes for high altitude and recovery (or as needed).
- 8+ breaths to help recovery from hangovers.

Please note: The canister will still feel full after the oxygen has been depleted.

Dispose of the Evolve Canister

Used Evolve Oxygen™ canisters are 100% recyclable. Dispose of the discharged Evolve Oxygen™ canister in the recycle bin.
