

TECHNICAL DATA	CAULKING GUN	M12 PCG
Production code.....	4313 26 04...	...000001-999999
Feed force.....	1780 N	
Battery voltage.....	12 V	
Weight according EPTA-Procedure 01/2014 (1,5 Ah).....	1,86 kg	
Weight according EPTA-Procedure 01/2014 (3,0 Ah).....	2,09 kg	

Noise/vibration information

Measured values determined according to EN 60 745. Typically, the A-weighted noise levels of the tool are:

Sound pressure level (Uncertainty K=3dB(A)).....	54,5 dB (A)
Sound power level (Uncertainty K=3dB(A)).....	65,5 dB (A)

Total vibration values (vector sum in the three axes) determined according to EN 60745.

Vibration emission value a_h	< 2,5 m/s ²
Uncertainty K=.....	1,5 m/s ²

WARNING

The vibration emission level given in this information sheet has been measured in accordance with a standardised test given in EN 60745 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period.

An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

⚠ WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. **Save all warnings and instructions for future reference.**

SAFETY INSTRUCTIONS

Read and understand the charger operator's manual packaged with your charger.

Always wear goggles when using the machine.

Remove the battery pack before starting any work on the machine.

Do not dispose of used battery packs in the household refuse or by burning them. Milwaukee Distributors offer to retrieve old batteries to protect our environment.

Do not store the battery pack together with metal objects (short circuit risk).

Use only System M12 chargers for charging System M12 battery packs. Do not use battery packs from other systems.

Never break open battery packs and chargers and store only in dry rooms. Keep dry at all times.

To reduce the risk of injury, electric shock, and damage to the tool, never immerse your tool in liquid or allow a liquid to flow inside the tool.

Battery acid may leak from damaged batteries under extreme load or extreme temperatures. In case of contact with battery acid wash it off immediately with soap and water. In case of eye contact rinse thoroughly for at least 10 minutes and immediately seek medical attention.

Warning! To reduce the risk of fire, personal injury, and product damage due to a short circuit, never immerse your tool, battery pack or charger in fluid or allow a fluid to flow inside them. Corrosive or conductive fluids, such as seawater, certain industrial chemicals, and bleach or bleach containing products, etc., can cause a short circuit.

SPECIFIED CONDITIONS OF USE

The caulking gun is intended to apply tube or sausage pack caulks and adhesives to surfaces. In case of doubt, please read the caulk or adhesive manufacturers' instructions.

Do not use this product in any other way as stated for normal use.

EC-DECLARATION OF CONFORMITY

We declare under our sole responsibility that the product described under "Technical Data" fulfills all the relevant regulations and the directives 2011/65/EU (RoHS), 2014/30/EU, 2006/42/EC, and the following harmonized standards have been used:

- EN 60745-1:2009+A11:2010
- EN 55014-1:2017:A11 2020
- EN 55014-2:2015
- EN IEC 63000:2018

GB-DECLARATION OF CONFORMITY

We declare as the manufacturer under our sole responsibility that the product described under "Technical Data" fulfills all the relevant provisions of the following Regulations S.I. 2008/1597 (as amended), S.I. 2016/1091 (as amended), S.I. 2012/3032 (as amended) and that the following designated standards have been used:

- BS EN 60745-1:2009+A11:2010
- BS EN 55014-1:2017:A11 2020

BS EN 55014-2:2015
BS EN IEC 63000:2018

BATTERIES

Battery packs which have not been used for some time should be recharged before use.

Temperatures in excess of 50°C (122°F) reduce the performance of the battery pack. Avoid extended exposure to heat or sunshine (risk of overheating).

The contacts of chargers and battery packs must be kept clean.

For an optimum life-time, the battery packs have to be fully charged, after used.

To obtain the longest possible battery life remove the battery pack from the charger once it is fully charged.

For battery pack storage longer than 30 days: Store the battery pack where the temperature is below 27°C and away from moisture. Store the battery packs in a 30% - 50% charged condition. Every six months of storage, charge the pack as normal.

BATTERY PACK PROTECTION LI-ION BATTERY

The battery pack has overload protection that protects it from being overloaded and helps to ensure long life. Under extreme stress the battery electronics switch off the machine automatically. To restart, switch the machine off and then on again. If the machine does not start up again, the battery pack may have discharged completely. In this case it must be recharged in the battery charger.

ADVICE FOR OPERATION

Anti-Drip and Rod Release

The caulk gun features an automatic anti-drip to prevent drips after the trigger is released. When the trigger is released, the motor will run for a short time to release the rod.

When a tube is emptied, the motor will run for a short time to release the rod, then shut off. Release the trigger and change the tube.

Overload

When an overload occurs, the tool will reach the maximum drive force and continue to hold this maximum force until the user releases the trigger. If material is not dispensing, make sure that:

- Nozzle tip is cut
- Inner seal in the caulk tube is broken
- Hardened material is removed from the nozzle
- Caulk tube is not damaged or frozen
- Rod is free of caulk/adhesive materials

TRANSPORTING LITHIUM BATTERIES

Lithium-ion batteries are subject to the Dangerous Goods Legislation requirements.

Transportation of those batteries has to be done in accordance with local, national and international provisions and regulations.

- The user can transport the batteries by road without further requirements.

- Commercial transport of Lithium-Ion batteries by third parties is subject to Dangerous Goods regulations. Transport preparation and transport are exclusively to be carried out by appropriately trained persons and the process has to be accompanied by corresponding experts.

When transporting batteries:

- Ensure that battery contact terminals are protected and insulated to prevent short circuit.
- Ensure that battery pack is secured against movement within packaging.
- Do not transport batteries that are cracked or leak.

Check with forwarding company for further advice

MAINTENANCE

CAUTION! Carriage and rod must remain clean and free of caulk and adhesive materials. Clean off materials according to caulk/adhesive manufacturer's recommendations.

Use only Milwaukee accessories and Milwaukee spare parts. Should components need to be replaced which have not been described, please contact one of our Milwaukee service agents (see our list of guarantee/service addresses).

If needed, an exploded view of the tool can be ordered. Please state the machine type printed as well as the six-digit No. on the label and order the drawing at your local service agents or directly at: Techtronic Industries GmbH, Max-Eyth-Straße 10, 71364 Winnenden, Germany.

SYMBOLS

CAUTION! WARNING! DANGER!

Always disconnect the plug from the socket before carrying out any work on the machine.

Please read the instructions carefully before starting the machine.

Always wear goggles when using the machine.

Do not dispose electric tools, batteries/rechargeable batteries together with household waste material. Electric tools and batteries that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility. Check with your local authority or retailer for recycling advice and collection point.
