

# QUICK START GUIDE

## Installing / Changing Battery

- Remove cap.
- Hold top and bottom of unit and pull apart to reveal battery compartment (Image 1).
- Place 1 AAA battery (included) into battery compartment as indicated (Image 2).
- Slide/snap bottom casing back into place.

**NOTE:** Prior to first use, test unit on small area. If sensitivity or allergic reactions occur, discontinue use immediately.

## How to Use

- Slide switch to ON position (Image 3). Light will turn on.
- Use on clean, dry skin. Pull skin tight and move in small, circular motions (Image 4).

**NOTE:** It is normal for hair removal head to become warm with use.

## For Optimal Results

- Use on clean and completely dry skin with no cream or cosmetic residue.
- Pull skin tight and move in small, circular motions (Image 4).
- If unit begins to slow down, clean head of hair residue.
- If unit is still running slow, change battery.
- It is normal for skin to appear red immediately after use due to pressure and friction applied.

## Cleaning (Be sure unit is off)

- After each use, clean head with included brush.
- Twist head counter-clockwise and lift off (Image 5).
- Carefully remove white stem (c) from head (Image 6A).

- Gently brush away hair residue on stem (c) and cutting surface (d) (Image 6A).
- Use brush inside head (Image 6B).
- Replace stem (c) inside head (Image 6).
- Place head back on unit and twist clockwise until it locks back in place.
