

## **Operating instruction**

### **Method of use**

1. Make sure the power cord is plugged in when starting mosquito control, when the fan and LED light start to work, pull out the power cord stop working.
2. When cleaning the remnants of mosquitoes, please turn off the power first, pick up the mosquito lamp with one hand and place it above the garbage can( so as not to mosquito wine on the ground), the other hand inverse when the box to remove mosquitoes.
3. After cleaning up mosquitoes, you can directly put them together and use them in the environment of mosquito killer.

### **The working principle of**

This product is a photocatalytic mosquito killer. The lamp adopts LED lamp beads to induce mosquitoes close to light source, the fan produces air flow to quickly inhale the mosquito killer mosquito box, then dry dehydration and die, things mosquito control, non-toxic, smokeless tasteless.

### **Matters needing attention**

1. Turn off the light or reduce the light in mosquito areas when using mosquito killer, and avoid interference of other light sources (such as sunlight) Lights, TV sets, light outside windows, etc. Avoid strong winds (such as fans, air conditioners, etc.) blowing directly on the unit, closed space, on one in the presence of the situation to use the best effect.
2. It is strictly forbidden for the eyes to stare at the light source for a long time when the product is working to avoid the glare of the light source on the eyes.
3. During use, the mosquito killer should be placed where children can't touch. Do not put your fingers or metal objects into it in the body, so as not to cause accidents.
4. If the power cord or fan is damaged, please send it to a professional for repair or replacement in order to avoid danger.
5. When not in use for a long time, please unplug the power plug and place it well.

**Product parameters**

Rated voltage: AC220V

Rated frequency: 50Hz

Rated power: 5W

Power supply: DC 5V 0.1A

Applicable area: 50-100 m<sup>2</sup>
