

Instruction:

1

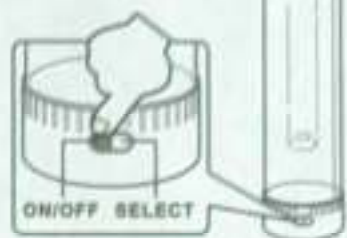

- Remove rubber cap.

- Fill aquarium to the top with water.
★ Distilled water is recommended.

- Connect A end to the product and plug B end of the adaptor into the wall socket.

- Turn on the switch.

2

- Put the jellyfish UPSIDE DOWN into the tank.

- ★ Before putting the rubber cap back on, please make sure that the water is filled to the black plastic position.

- Add 7-8 drops of liquid dish washing detergent.

- ★ Turn on the switch at least 10 minutes to let the air bubbles in the tube disappear before putting the jellyfish in the aquarium.

- Try to avoid air bubbles forming on the jellyfish. If necessary, you can use a straw or stick to help remove the air bubbles.

- Put the rubber cap back on.

ON/OFF:

1. Press the button to activate the lamp in "automatic light color changing" mode.
2. Press again to turn off.

SELECT: Press to select 5 colors.

3

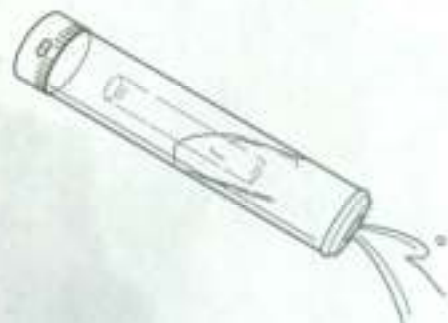

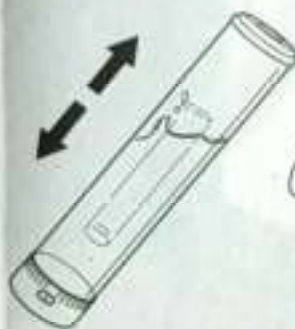

UP
Always place on a flat surface.

Handle with care.

- Dry the surface of the aquarium.

- Change the water when you notice some cloudiness.

- For best performance and durability of the unit, it will switch off automatically after 4 hours of operation.
- Leave the unit off for 1 hour before pressing the button to re-activate it.
- It will take 12 hours for the jellyfish to swim beautifully in the tube.
