PRODUCT OVERVIEW

Working with your MacBook is giving you the freedom of location and time. However, the keyboard may not be suitable for a whole day of work. Especially working with numbers and formulas can be tedious as the numerical keypad is missing which also hosts the mathematical signs.

The LMP USB-C Keyboard KB-1843 can be attached to any USB-C (Thunderbolt 3) port of your Mac or even iPad Pro. It's a fullsize, 3-zone keyboard with numerical keypad that includes the important "=" sign. No adapter needed when using it with a MacBook or iPad Pro – just plug it in and start working efficiently.

The KB-1843 has an all aluminum upper cover and features an extra USB-C port on the right upper corner for data exchange with low-power devices (e.g. a USB-C mouse). The Mac-typical special function keys can be used either as the printed symbols (e.g. brightness up/down, play/pause, etc.) or as true programmable function keys. Swapping between these two functions is made easy by a simple key combination ("fn + esc"). The laser-engraved keycaps have a short travel distance which closely resembles the MacBook keys. The stylish outlook fits perfectly with your Mac and iPad Pro environment – working efficiently and in style.

The system requirements are macOS 10.12 and higher, iOS 13 and higher and iPad OS or Windows OS 7 and higher. It can be used with any Mac or iPad Pro that features a USB-C (Thunderbolt 3) port.

P/N 22301

KEY FEATURES

- USB-C keyboard for Mac and iPad Pro with 106 keys
- Fullsize 3-zone keyboard with numerical keypad
- Aluminum upper cover
- Laser-engraved keycaps
- USB-C port for low-powered USB-C peripherals (data transfer only, no video)
- Mac-like design
