

Software Installation

1. Download the app "Magic Home Pro" from App Store or Google Play Store or Scan the QR code below.
2. Turn on the bulb, run the app and register/login your Magic Home account.
3. Click "+" button to connect your WiFi bulb (LEDnet**
*****) to your WiFi router, Enjoy!

(A) How to restore the factory setting for the bulbs?

- a) Power on the bulb.
- b) Wait 3-5 seconds and then power off the bulb.
- c) At the end of the 4th time when you turn on the bulb, it will emit strobe for a few seconds. After that it will become fully bright at which point the reset is complete. Once you have reset the bulb, you should be able to see its wifi IP "LEDnet*****" again under your mobile device's wifi settings. (if not, please restart your wifi, wait for a while and you will see it).

(B) How to connect the bulb to Wi-Fi network?

- a) Run the newest App "Magic Home Pro" and Click "+" button on top right corner.
- b) Register/Login your Magic Home account.
- c) Go to your Wi-Fi settings on your mobile device.
- d) Find the bulb's SSID "LEDnet*****" and connect to it. (If can't found, Reset your bulb, turn it on/off 4 times)
- e) Open Magic Home App and connect device to Wi-Fi network (choose your router and login your password, ensure the router is 2.4GHZ)
