### WARNING

Lacrosse is a dangerous sport; sticks, balls and people move at high speeds. Collisions are part of the game and can result in life-threatening injuries, even death. Sticks and balls can cause life-threatening disfiguring or crippling injuries. Protective gear, if properly maintained, may reduce the risk of some injuries, but can not prevent serious injuries. Your best protection is to follow the rules, play safe, and get out of the game if you are injured.
