High quality bathroom taps

MIZZO

Design

1. Technical information

Hot & cold water supply pressure	Min. 0.05 MPa (flowing pressure), Max 0.75 MPa (static pressure)
Recommended water temperature	60±5°C - 90°C note: do not use steam as hot water supply
Required tap hole	35 mm

2. Required tools for installation

Adjustable Wrench

Hands

Allen Key

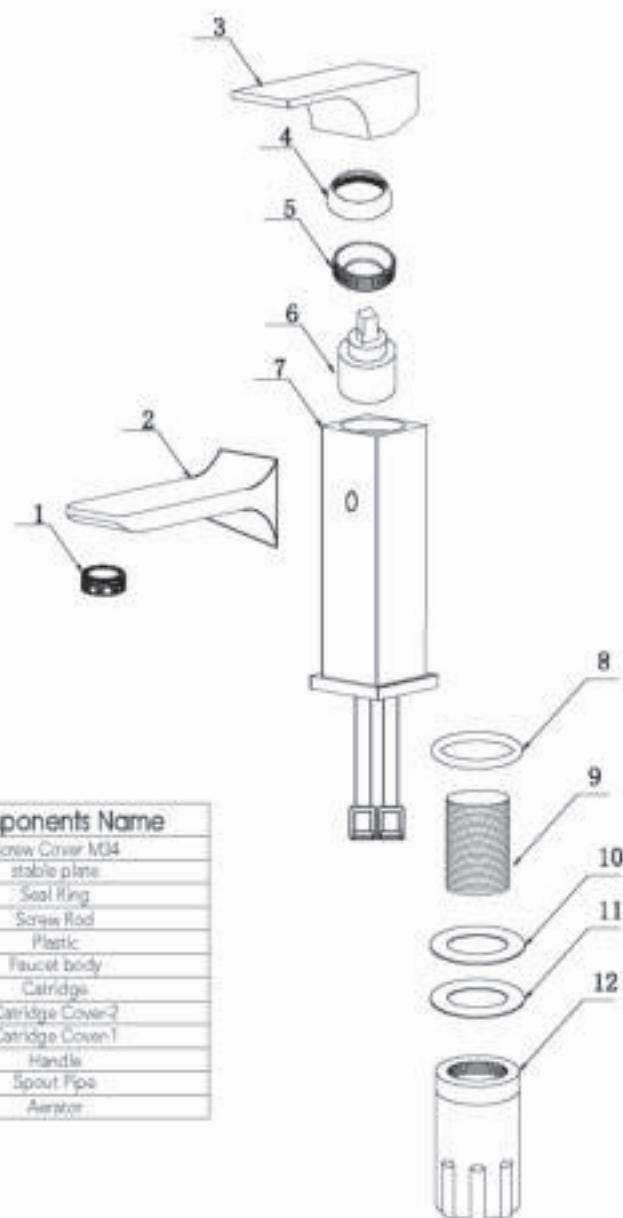

Multifunctional pipe wrench

3. Included items

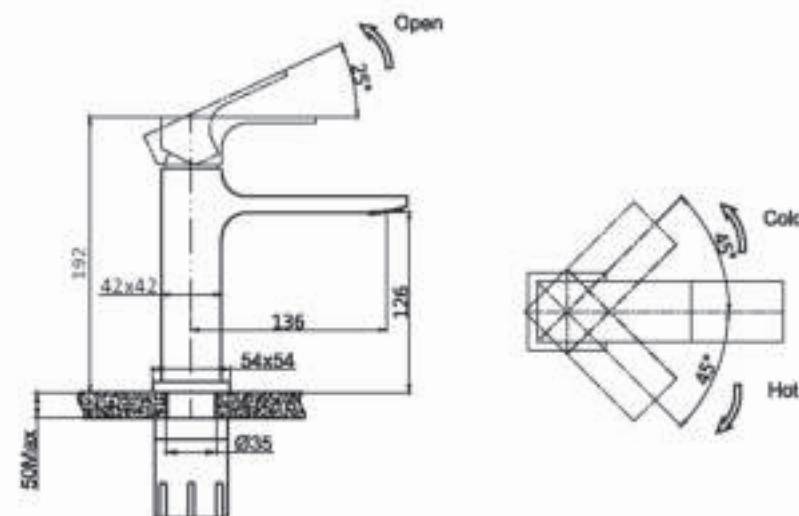

4.Parts Checklist

No.	Components Name
12	Screw Cover M34
11	stable plane
10	Seal Ring
9	Screw Rod
8	Plastic
7	Faucet body
6	Cartridge
5	Cartridge Cover-2
4	Cartridge Cover-1
3	Handle
2	Spout Pipe
1	Aerator

5.Dimension Drawing

6.Installation Method

STEP
01

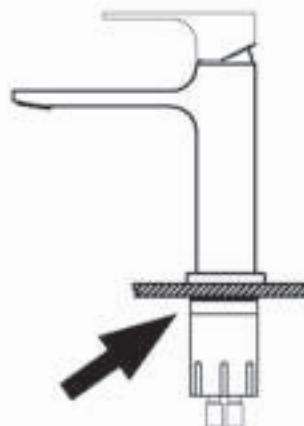

Unscrew the nut of the faucet

STEP
02

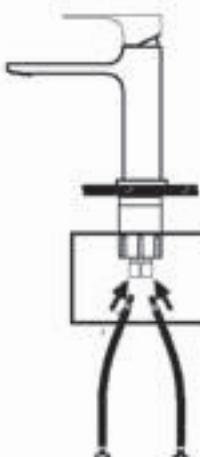

Fit the faucet body into the installation hole of the sink.

STEP
05

Make sure all connections have been tightened; Keep the handle turned off; Open main water supplies and drainage system, check and repair connection if you find leakage. Remove the spray head, open faucet and keep water flowing for a minute to flush out all debris. Wash the spray head. Turn off water; Re-install spray head.

STEP
03

Screw the nut on the pipe thread to fasten the faucet.

STEP
04

Connect the flexible connectors to the water supply hoses or filter valve taps.

8.Care and maintenance

When installing the tap to new water supply hoses, we recommend that they are rinsed before the installation of the tap.

In the process of using, care should be taken when cleaning this product. Use clean and dry soft cloth with mild soap to clean the product; do not use abrasive cleaners, chemicals or solvents (ammonia water, spirits of salt, harsh cleaner or cleaning powder) as they can result in surface damage.

When not using the faucet for a long time, please turn off water supplies valve.

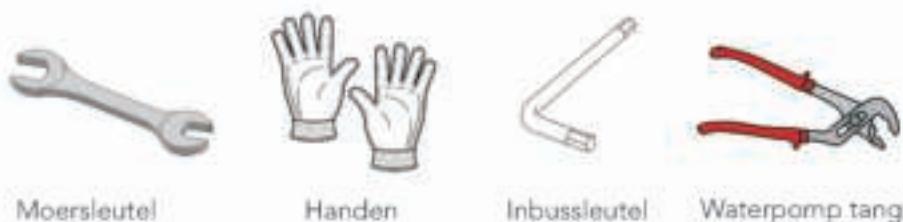

9.Warranty

Since 2009 Dutch company Mizzo designs and develops design bathroom products like taps and bathroom sinks. We now offer a complete program of at least 100 design products. They all meet the strict rules that Mizzo requires of its own products. Mizzo therefore provides a 5 year warranty on its bathroom taps and a lifetime warranty on all bathroom sinks.

6.Installatie

8.onderhoud en gebruik

Als u de kraan op nieuwe watertoevoerslangen installeert, raden we aan deze te spoelen voor de installatie van de keukenkraan.

Tijdens het gebruik moet u voorzichtig zijn bij het reinigen van dit product. Gebruik een schone en droge zachte doek met milde zeep om het product te reinigen, gebruik geen schuurmiddelen, chemicaliën of oplosmiddelen (ammoniakwater, alcohol, zoutreiniger of reinigingspoeder). Deze kunnen resulteren in oppervlaktebeschadiging. Draai de watertoevoerkraan dicht als u de kraan lange tijd niet gebruikt.

9.Garantie

Sinds 2009 ontwerpt en ontwikkelt het Nederlandse bedrijf Mizzo designkeukenproducten zoals kranen en spoelbakken. Alle producten voldoen aan de strikte regels die Mizzo van zijn eigen producten verlangt. Mizzo biedt daarom 5 jaar garantie op de keukenkranen en levenslange garantie op alle spoelbakken.

1. Technische Information

Druck der Warm- und Kaltwasserversorgung	Min. 0,05 MPa (Fließend), Max 0,75 MPa (Statisch)
Empfohlene Wassertemperatur:	60+5°C - 90°C Hinweis: Verwenden Sie keinen Dampf als Warmwasserversorgung
Erforderliches Hahnloch	35-mm

2. Erforderliche Werkzeuge für die Installation

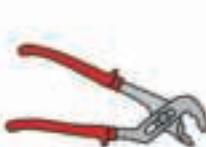

Schraubenschlüssel

Handschuhe

Inbusschlüssel

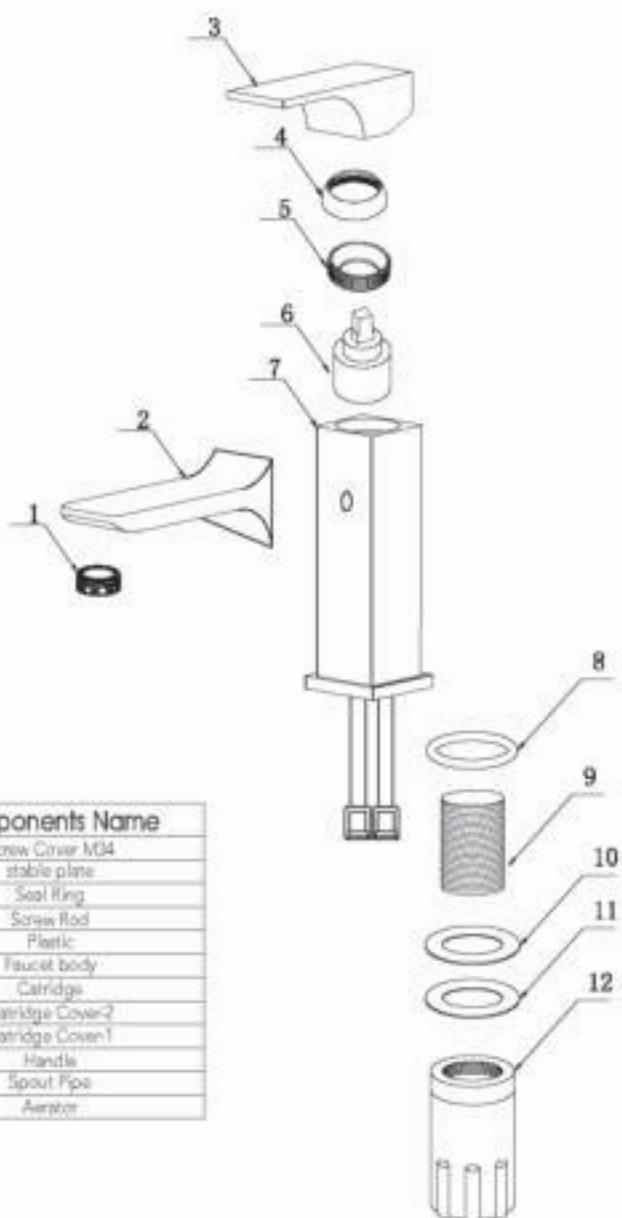

Rohrzange

3. Lieferumfang

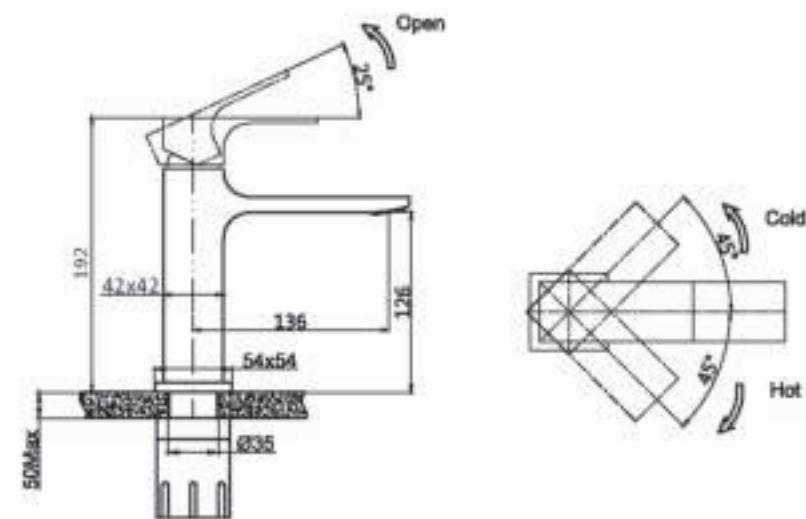

4. Armatur Einzelteile

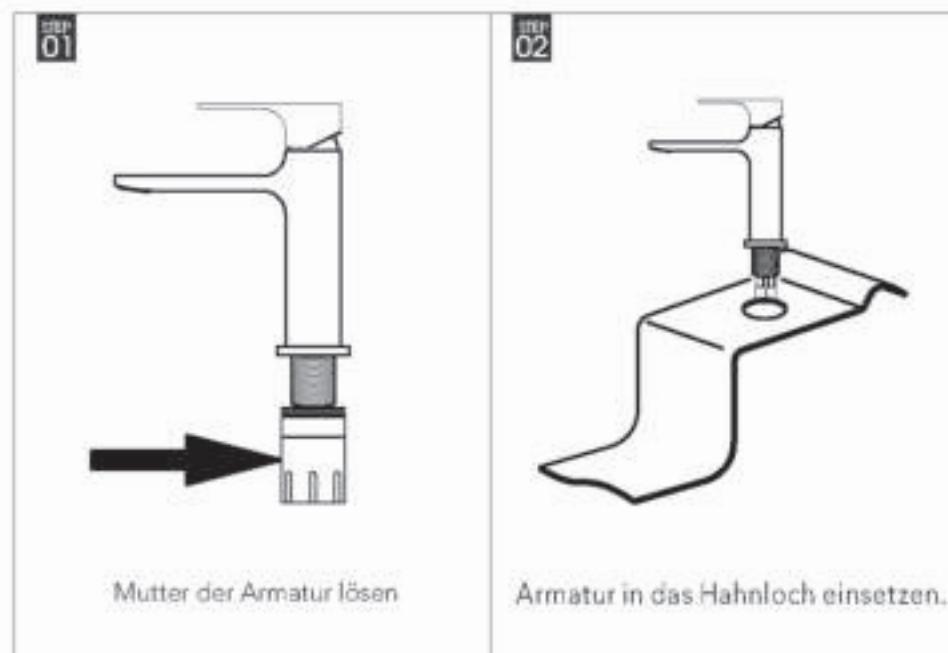

No.	Components Name
12	Screw Cover M34
11	stable plate
10	Seal Ring
9	Screw Rod
8	Plastic
7	Faucet body
6	Cartridge
5	Cartridge Cover-2
4	Cartridge Cover-1
3	Handle
2	Spout Pipe
1	Aerator

5. Größentabelle

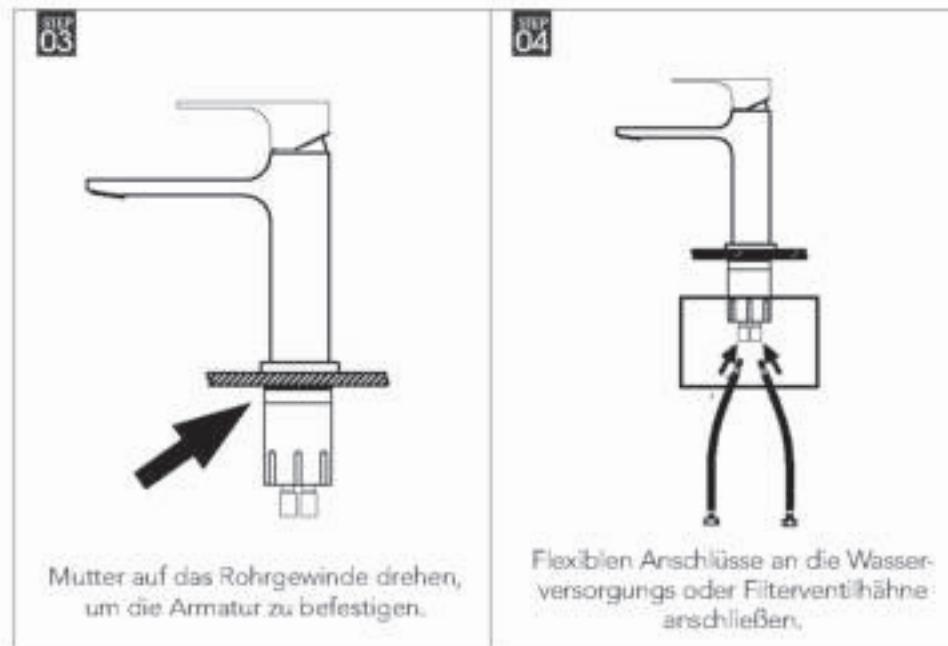

6. Funktionsüberprüfung

Mutter der Armatur lösen

Armatur in das Hahnloch einsetzen.

Mutter auf das Rohrgewinde drehen, um die Armatur zu befestigen.

Flexiblen Anschlüsse an die Wasserversorgungs oder Filterventilhähne anschließen.

8. Pflege und Wartung

Armatur zugekrempelt lassen und sicher stellen, dass alle Anschlüsse richtig angeschlossen sind. Hauptwasserleitung öffnen und Anschlüsse der Armatur auf undichte Stellen kontrollieren. Brause aus der Halterung entfernen und Wasser eine Minute lang fließen lassen, um alle Rückstände in Armatur und Anschlüsse auszuspülen. Zum Schluss Brause abwaschen, Wasser abdrehen und Brause zurück in die Halterung platzieren.

Bei der Installation der Armatur an neue Wasserversorgungsschläuche, wird empfohlen, die Schläuche vor der Installation der Armatur zu durchzuspülen.

Die Reinigung verschmutzter Armaturen erfordert eine gewisse Vorsicht. Armatur ausschließlich mit einem sauberen und weichen Tuch reinigen. Bei Kalkablagerungen wird ein mildes Reinigungsmittel empfohlen. Auf keinen Fall aggressive Reiniger verwenden (Scheuermittel, Chemikalien oder Lösungsmittel wie z.B. Ammoniakwasser, Salzgeist, scharfe Reinigungsmittel oder Reinigungspulver) da dies zu Oberflächenschäden führen kann.

Wasserversorgungsventil ausschalten wenn der Wasserhahn für längere Zeit nicht benutzt wird.

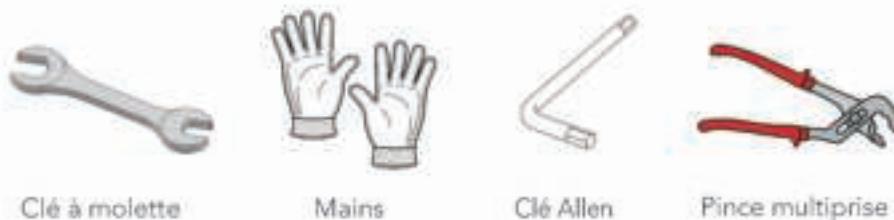

9. Garantie

Seit 2009 entwirkt und entwickelt das niederländische Unternehmen Mizzo Designküchenprodukte wie Armaturen und Küchenspülern. Mizzo Design bieten ein komplettes Programm von 100 Designprodukten an. Alle Produkte unterliegen strengsten Qualitätsanforderungen. Die Garantiezeit auf Küchenarmaturen beträgt 5 Jahre und auf Küchenspülern Lebenslang.

1. Informations techniques

Pression d'eau froid et chaud	Min. 0,05 MPa (pression circulant), Max 0,75 MPa (pression statique)
Température d'eau recommandé	60±5°C - 90°C Attention: n'utilisez pas de vapeur comme eau chaude
Orifice mitigeur	35 mm

5	Cartridge Cover-2
4	Cartridge Cover-1
3	Handle
2	Spout Pipe
1	Aerotoc

5. Dimensions

6. Étapes d'installation

8.Care and maintenance

Quand vous connectez le mitigeur à une alimentation d'eau avec des tubes neufs, il est conseillé de rincer les tubes avant d'installer le mitigeur.

Dans le processus d'utilisation, il convient de veiller à bien entretenir l'article. Utilisez un chiffon doux et humide avec un savon doux pour nettoyer le mitigeur. N'utilisez pas de nettoyants abrasifs, de produits chimiques ou de solvants (de l'ammoniac, de l'eau de javel, des nettoyants agressifs ou du savon en poudre) vu qu'ils peuvent endommager la surface du mitigeur.

En cas de non-utilisation prolongée on vous conseille de fermer l'alimentation d'eau.

9.Warranty

Mizzo Design est une marque européenne d'origine aux Pays-Bas. Nous tenons à n'utiliser que les meilleurs matériaux dans le procès de fabrication, afin de pouvoir garantir la qualité de nos produits. Nous n'acceptons que le meilleur pour créer le meilleur. Mizzo Design offre une garantie de 5 ans pour les robinets et une garantie vie pour les évier de cuisine.

1. Informazione tecnica

Pressione di alimentazione dell'aqua fredda e calda	Min. 0,05 MPa (pressione di flusso), Max 0,75 MPa (pressione statica)
Temperatura raccomandata dell'aqua	60±5°C - 90°C Nota: non utilizzare vapore come acqua calda
Diametro foro rubinetto	35 mm

2. Strumenti necessari per l'installazione

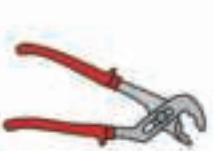

Chiave inglese
(regolabile)

Mani

Set chiavi a brugola

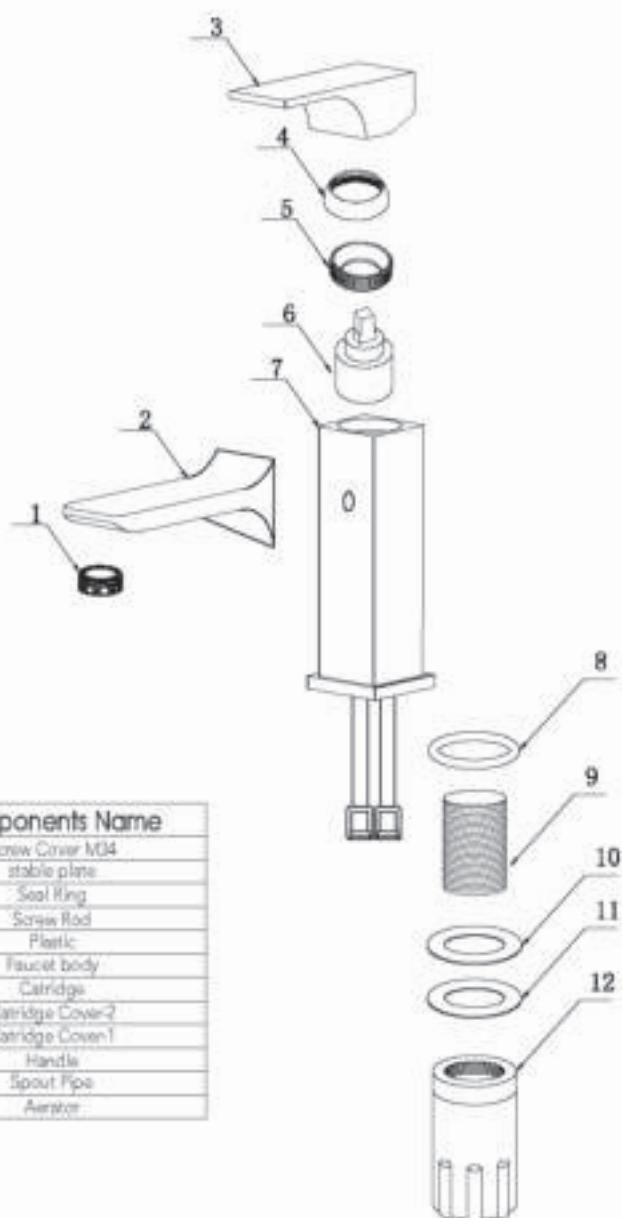

Chiave pappagallo
(opzionale)

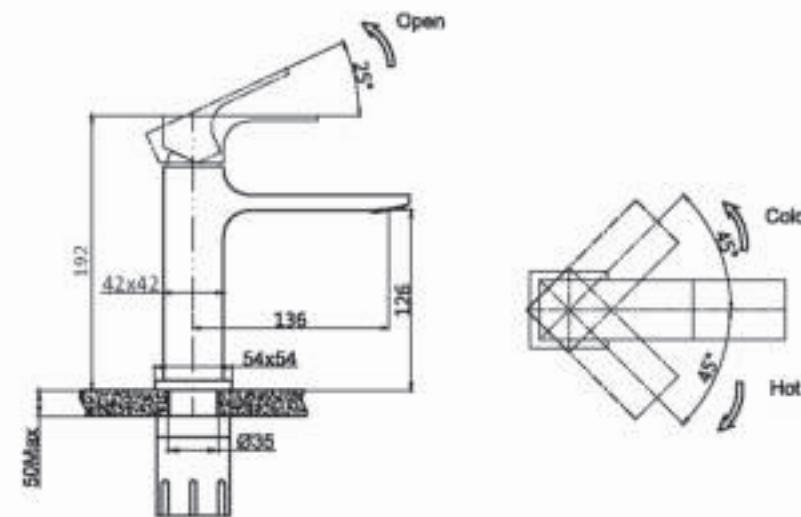

3. Articoli inclusi

4. Parti del rubinetto

5. Dimensioni

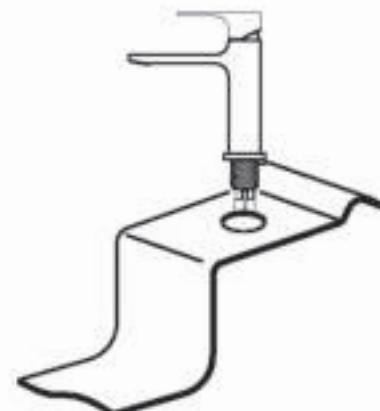

6. Passi di installazione

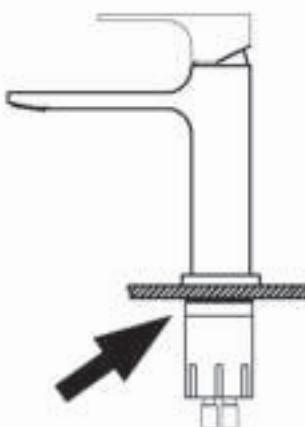

STEP
01

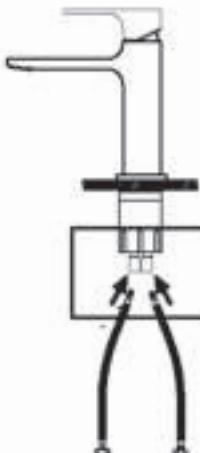

Svitare il dado del rubinetto

STEP
02

Posizionare il rubinetto nel foro

STEP
03

Vitare il dado alla filettura del rubinetto, tirando giù la molla.

STEP
04

Connettere i flessibili all'alimentazione d'acqua

STEP
05

Assicurati che tutte le connessioni sono ben serrate. Non aprire la maniglia. Apri l'alimentazione di acqua. Verifica le connessioni e ripara dove è bisogno. Svitla la doccetta, apri la maniglia e fa scorrere l'acqua per un minuto per eliminare tutti i residui presenti nei tubi. lava la doccetta, chiudi il rubinetto e reinstalla la doccetta.

8.Cura e manutenzione

Quando il rubinetto viene installato su un'alimentazione di acqua con tubi nuovi, è consigliato sciacquarli prima dell'installazione.

Nel processo di utilizzo occorre prestare attenzione per la pulizia di questo articolo. È consigliato utilizzare un panno pulito e umido con un sapone neutro. Non utilizzare detergenti abrasivi, prodotti chimici o solventi (ammoniaca, acido doridico, detergenti aggressivi o detergenti in polvere), dato che possono danneggiare la superficie.

Quando il rubinetto non viene utilizzato per un periodo lungo consigliamo di chiudere le valvole dell'acqua (l'alimentazione).

9.Garanzia

Da 2009 Mizzo Design, un marchio olandese per accessori da cucina, progetta e sviluppa degli articoli come rubinetti e lavelli da cucina. Nel frattempo ci sono quasi 100 prodotti che devono soddisfare i rigorosi controlli di qualità imposti dalla casa Mizzo Design. Mizzo Design offre una garanzia di 5 anni su tutti i rubinetti da cucina e una garanzia a vita per i lavelli da cucina.
