

## Instruction of Assembly

### Round ceiling fan light

1. open the box and take out all the components

2. assemble the motor to the light, with the small screws and nuts

3. connect the wire of the light to the motor, pay attention to the proper side

4. put down the plastic circle on the light

5. fasten the plastic circle with the mini L shaped wrench

6. assemble the fan blade to the light

7. lock down the fan blade with the cover (twist it in counterclockwise direction)

8. install the cross with the sharp-ended screws to the ceiling (the flat side of the cross should be faced to the ceiling)

9. connect the wires of the light to the home electric system, and install the light to the cross with the screws
