CE-RED TEST REPORT

| Prepared For: | Shenzhen Juku Intelligent Technology Co.,Ltd. 1113, 11/F, Baicai Yungu Building, No.1, Industrial Garden Road, Dalang, Longhua, Shenzhen, China |
|------------------|---|
| Product Name: | Wake-Up Light |
| Trade Name: | N/A |
| Model : | ACA-002、ACA-002-S、 ACA-002-B、ACA-002-M |
| Prepared By : | Shenzhen United Testing Technology Co., Ltd. |
| J. | 2F, Annex Bldg, Jiahuangyuan Tech Park, #365 Baotian 1 Rd, Tiegang Community, Xixiang Str, Bao'an District, Shenzhen, China |
| Test Date: | October 20, 2018 – October 26, 2018 |
| Date of Report : | October 26, 2018 |
| Report No.: | UNIA2018102516SR-01 |

TEST REPORT EN 60950-1 Information technology equipment – Safety – Part 1: General requirements

| Report reference No | UNIA2018102516SR-01 |
|----------------------------|--|
| Compiled by (+ signature): | Steven Steve Contraction |
| Approved by (+ signature): | Liuze livre |
| Testing Laboratory Name: | Shenzhen United Testing Technology Constant |
| Address: | 2F, Annex Bldg, Jiahuangyuan Tech Park, #365 Baotian 1 Rd, Tiegang Community, Xixiang Str, Bao'an District, Shenzhen, China |
| Testing location: | As above |
| Applicant's Name | Shenzhen Juku Intelligent Technology Co.,Ltd. |
| Address: | 1113, 11/F, Baicai Yungu Building, No.1, Industrial Garden Road, Dalang, Longhua, Shenzhen, China |
| Test specification | |
| Standard | EN 60950-1:2006+A11:2009+A1:2010+A12:2011+A2:2013 |
| Test procedure: | RED |
| Non-standard test method | N/A |
| Test Report Form No. | IECEN60950_1F |
| Master TRF: | Dated 2014-02 |
| | |

This test report is for the customer shown above and their specific product only. It may not be duplicated or used in part without prior written consent from UNI lab.

| Test item description: | Wake-Up Light |
|------------------------------|---|
| Trademark | N/A |
| Manufacturer: | Shenzhen HongTaiDingYe Electronics Co.Ltd. 6th Floor, Block 8,LongBi Industrial Zone, BanTian Street, LongGang Dist, ShenZhen |
| Model and/or type reference: | ACA-002、ACA-002-S、 ACA-002-B、ACA-002-M |
| Ratings: | Input: 100-240V~50/60Hz,0.3A Output: 5V2A 3.0VDC CR2032 Lithium unchargable battery inside |

Page 3 of 53

Summary of testing:

Testing location:

Shenzhen United Testing Technology Co., Ltd.

2F, Annex Bldg, Jiahuangyuan Tech Park, #365 Baotian 1 Rd, Tiegang Community, Xixiang Str, Bao'an District, Shenzhen, China

Tests performed (name of test and test clause):

The sample(s) tested complies with the requirements of EN 60950-1.

These tests fulfil the requirements of standard ISO/IEC 17025.

When determining the test conclusion, the Measurement Uncertainty of test has been considered.

Heating test (4.5):

Tma = 40.0°C (declared by manufacturer)

Tamb: 24.2 °C – 25.4 °C

J-type thermocouple used for temperature measurement.

This test report includes:

Annex 1: Photos.

Summary of compliance with National Differences:

Compliance with the National requirements of CENELEC common modification.

Copy of marking plate:

Wake-Up Light Model: ACA-002 Input: 100-240V~50/60Hz,0.3A Output: 5V---2A 3.0VDC CR2032 Lithium unchargable battery

Report No.: UNIA2018102516SR-01

General remarks:

The test results presented in this report relate only to the object tested. This report shall not be reproduced, except in full, without the written approval of the Issuing testing laboratory.

"(See Enclosure #)" refers to additional information appended to the report. "(See appended table)" refers to a table appended to the report.

Note: This TRF includes EN Group Differences together with National Differences and Special National Conditions, if any. All Differences are located in the Appendix to the main body of this TRF.

This document is issued by the company under its General Conditions of Service accessible at www.unilab.hk. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.

Unless otherwise stated: (a) the results shown in this document refer only to the sample(s) tested and (b) such sample(s) are retained for 12 months. This document cannot be reproduced except in full, without prior approval of the company.

General product information:

Wake-Up Light, powered by certified external power supply, housed with plastic enclosure, for indoor use only.

Model difference:

- 1. All models have same construction and circuit principle; But difference from the model name.
- 2. The differences do not influence the safety performance of the product.
- 3. All tests were conducted on the model ACA-002 and the test result was pass.

| Clause | Requirement | Remark | Result |
| | | | |
| | EC 60950-1, GROUP DIFFERENCES (CENELEC o | | |
| Clause | Requirement + Test | Result - Remark | Verdict |
| | (long term LAeq,T) measured over the duration of the song is lower than the average produced by the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA. In this case T becomes the duration of the song. NOTE 4 Classical music typically has an average sound pressure (long term Leq,T) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the song and compare it with the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA. | | |
| 'n, | For example, if the player is set with the programme simulation noise to 85 dBA, but the average music level of the song is only 65 dBA, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dBA. | L. | نی |
| | Zx.3 Warning | i. | N/A |
| | The warning shall be placed on the equipment, or on the packaging, or in the instruction manual and shall consist of the following: - the symbol of Figure 1 with a minimum height | | |
| | of 5 mm; and – the following wording, or similar: | r v | |
| | "To prevent possible hearing damage, do not listen at high volume levels for long periods." | 4 | |
| | AND A | | J |
| | Figure 1 – Warning label (IEC 60417-6044) | | |
| 5 | Alternatively, the entire warning may be given through the equipment display during use, when the user is asked to acknowledge activation of the higher level. | نی نی | |
| | Zx.4 Requirements for listening devices (headp | phones and earphones) | N/A |
| | Zx.4.1 Wired listening devices with analogue input With 94 dBA sound pressure output $L_{Aeq,T}$, the input voltage of the fixed "programme simulation noise" described in EN 50332-2 shall be \geq 75 mV. | نی | N/A |
| | This requirement is applicable in any mode where the headphones can operate (active or passive), including any available setting (for example built-in volume level control). | | |
| 5 | NOTE The values of 94 dBA – 75 mV correspond with 85dBA – 27 mV and 100 dBA – 150 mV. | | |

| Clause | Requirement | Remark | Result |

Remark:

1) T shall not exceed (Tmax + Tamb – Tma), see clause 1.4.12.

T: is the temperature of the given part measured under the prescribed test conditions;

Tmax: is the maxnmum temperature specified for compliance with the test;

Tamb: is the ambient temperature during test;

Tma: is the maximum ambient temperature during permitted by the manufacturer's specification, see below 2).

2) The maximum ambient temperature is +40.0 $^\circ \! \mathbb{C}$

Measured by thermocouple, transformer T1 is Class B material, see table 1.5.1 for details.
