

Usage Manual

unfolding steps

1. Unfold the studio by pulling from the edge, it will be easy and smooth to open.

2. Connect three radius together with the **Button** inside the corner. It will be easy to get the right position when you feel it.

3. Here you go, fine-tune the item, hang up the background and corner to the power supply and start your shooting now.

folding steps

1. Pull apart the studio from the top and bottom, it will be unfolded easily.

2. Fold the top side and middle with **Button** positioning, put the background inside.

3. Fold the bottom side and push the edge with radius corner into the gap between the folded parts, and put it back into the packaging bag. Here we done.
