

Product Features:

1. This product is a new type of environmentally friendly and portable pet water cup, with integrated design of drinking trough and cup body, which conforms to ergonomics and is convenient for one-handed control and easier to drink water. The pet water cup is tiny, with a lanyard on the top, which is easy to carry.
2. It is equipped with a large button water outlet switch, which is easy to get water in one second, so that it is reliable and safe. Built-in silicone seal ring with double waterproof and leak-proof design. Or you can long press the water button and erect the cup, so that the remaining water can flow back into the cup.
3. The cup has a large capacity storage of water. O-shaped direct drinking and wide drinking trough design, easy to drink, fits to dog's oral structure. It will not spill, suitable for all kinds of large, medium and small dogs to be used outdoors for a long time.
4. Each part can be disassembled and used independently. The back of the cup body is designed with a pooper scooper component, which can be directly removed to clean up the dog's poop. After use, it is directly snapped back to the back of the cup body. The base part can store garbage bags, dog's poop can be directly put into the garbage bags without polluting the environment.
5. This product is made of healthy and environmentally friendly food-grade ABS material, with a smooth surface. It is strong, durable and high temperature resistant. Easy to clean, each part can be directly rinsed with water and wiped off.
