

2.4GHz

Wireless Mouse

«« The Next Generation Sensor »»

Technical specifications

- Supply voltage (mouse):DC 1.5V
- Effective working distance:10 meters
- Supply voltage (receiver):DC 4.4--5.25V
- Power consumption:Max.The biggest 19mA.
- The biggest sleep power consumption:80uA
- 7 the battery life:about 180 days
- Resolution:1600DPI
- Working temperature:0°C to 40°C
- Work humidity:90%RH or less Or less
- The key operate number: 5000000 times

English

- Wireless Nano-receiver, plug and play
- Receiver can be hidden in the mouse jack
- 1600DPI high-precision scanning speed can be adjusted to ensure accurate control.
- 2.4G technology, stable wireless connection
- Into the front / back page buttons to quickly browse the Web
- Smooth metal roller
- Very comfortable ergonomic design

France

- Sans fil Nano--récepteur, plug and play
- Le récepteur peut être caché dans la prise de souris
- 1600dpi haute précision la vitesse de balayage peut être ajusté afin d'assurer un contrôle précis.
- Technologie 2.4G, connexion sans fil stable
- Dans les boutons de la page avant / arrière pour naviguer rapidement sur le Web
- Rouleau en métal lisse
- Très confortable design ergonomique

Netherlands

- Draadloze nano-ontvanger, plug and play
- Ontvanger kan worden verborgen in de multi-aansluiting
- 1600dpi installbare high-precision scanner-rolletje. Om een nauwkeurige controle te waarborgen
- 2.4G-technologie, een stabiele draadloze verbinding
- In de front / back pagina knoppen om snel te
