Genius Ideas® Solar Animal Scare with Ultrasound & Flash Light "Mini"

The solar-powered Genius Ideas® animal fright with ultrasound and flashlight is probably the cheapest and most environmentally friendly way to keep out unwanted animal visits. The Universal animal scare can be easily hung or plugged into the garden. The Motion detector automatically triggers a quenching sound and flashlight as soon as a troublemaker penetrates into the monitored area. Now your front yard will no longer become a dog & Litter box! Also, mice or rats, as well as foxes and birds, will be removed from your property expelled. The animal scare works completely without electricity and chemical products!

This device emits ultrasound and flashes to repel dogs, cats, birds, and any pets The motion sensor automatically switches on when it detects an animal Works on solar energy, wall-mounted or stacked in the ground, no chemicals needed Detection angle: 120°. Range: 5m (26m²). Operation with a rechargeable battery type AAA 1.2V 600mAh Ni-MH (included), also USB rechargeable (cable included). Item dimensions: 4 x 6 x 9 cm. Ground spike: height 23.5 cm. Solar panel: 5.35 x 3.05 cm (2V/50MA). Frequency:21KHz
