

# LABIRENT®

MODEL: TJ10

## Mini Fridge Instruction Manual

# Warm Tips

Thank you for choosing our product. We hope you will enjoy using the appliance. Read the operating instructions carefully before putting the appliance into operation. Keep the instructions, the receipt and, if possible, the box with the internal packing. If you give this device to others, please also enclose with the operating instructions.

## Using the Appliance

### 1. Connecting to the right power

- 1.1. Before you plug into the power outlet, make sure that the mains voltage corresponds with the appliance. Refer to the rating plate for voltage details.
- 1.2. Connect the appliance to power outlet with appropriate voltage.
- 1.3. Turn on the motor vehicle's power engine, then connect to DC power.

### 2. Using the Chilling or Heating Function

- 2.1. Push switch to "COOL" position. Cooling starts when the green indicator lights up. Temperature can reach 15 to 18°C below room temperature.
- 2.2. Push the switch to "HEAT" position. Heating starts when the red indicator lights up. Temperature can reach up to 40°C to 50°C.

### 3. Terminating operation

There is no automatic shut-off so product will keep running as long as it is connected to a power supply and switched on. To stop the appliance, switch to OFF mode or unplug.

## Cleaning and Maintenance

1. Always unplug the appliance before cleaning.
2. Never immerse the appliance in water due to risk of electric shock or fire.
3. If product is being used everyday, make sure dry with a cloth every two days.
4. Close the door well after cleaning.

## Troubleshooting

Problem	Possible Reasons	Solutions
When appliance is not functioning properly.	The switch setting is incorrect.	Check the switch setting.
	No electricity is being supplied to the appliance.	Check the connection to the energy source.
There is much water in the unit or under the feet.	This is normal because the moisture has been chilled to water.	Clean the unit every 2 days if the chilling function keeps working continuously.
The appliance shuts off during operation.	Inadequate ventilation.	Keep the ventilation slots clean. Relocate the appliance for better air circulation.

## Special Safety Instructions

1. If a power cord becomes damaged, it must be replaced with a special cord only available from the manufacturer.
2. This appliance is only safe around children aged 8 and above. People with physical or mental disabilities can use it under supervision or with proper instructions.
3. Children shall not play with the appliance.
4. Cleaning and maintenance should not be performed by children younger than 8 years old or without supervision.
5. Keep the appliance and its cord out of reach of young children.
6. The appliance is not intended to be operated through an external timer or remote-control system.
7. Do not immerse the device in water when cleaning. Follow the instruction section in the manual labeled "Cleaning".
8. Never place the appliance next to naked flames or other heat sources.
9. Do not open the lid more often than required or leave it open longer than necessary. This will influence the cooling or heating duration.
10. The cooling or heating duration also depends on the ambient temperature.

11. This appliance is not suitable for permanent operation.
12. The unit can be connected to two different energy sources: AC(220 V) or DC(12V).
13. The indicator lights: green for cooling, red for heating.
14. Do not switch from one operating mode directly into another. To change, turn off the appliance first and wait about 30 minutes before switching to the other mode.
15. Keep the ventilation free, or it may result in overheating and fire.
