

## Method of use

### Inflatable

Insert the inflation nozzle to open the inner valve

Pour in 80-90% gas to cover the gas nozzle

Press the air nozzle to inflate

### Deflation

Open the valve

Pinch open the air valve  
Waiting for the gas streamer

1. Do not over-inflate or rush into high-pressure gas
2. Do not jump on inflatable products
3. Do not place inflatable products next to flames or high temperature objects
4. When not in use for a long time, it should be folded and placed in a flat and dark place to avoid excessive friction and sharp objects.
5. Natural air leakage of inflatable products is a normal phenomenon
