

How to use your hair chalk pens

1. Prepare your hair

Make sure your hair is clean, and a little damp to help the chalk stick.

2. Apply the chalk

Apply the chalk pen in a downward motion holding the end of the hair point.

3. Let it dry

Allow the hair to dry naturally, or for a longer lasting result, seal the chalk by drying it with a hair dryer. To seal it even more, use a hair straightner.

Precautions.

Adult supervision recommended:

Keep out of reach from babies and toddlers to avoid being swallowed. Whilst ingestion should not cause any problems, seek medical attention in the event of swallowing the hair chalk.

Whilst allergic reactions are rare, those who have particularly sensitive skin or are prone to skin reactions should use the hair chalk with caution. Test the chalk on a small part of your skin 24 hours before full application (patch test).

Don't use if skin irritation appears!

If the hair chalk comes in contact with the eyes, rinse immediately with warm water.
