

### Mambobaby

Mambobaby air free float

1. Non inflatable, just use when you want. No troubles.
2. Mother can spend more time with the child.

1. non-leakage, more secure.

### The inflatable ring

1. The inflatable ring needs to be inflated with so many nozzles, Mother also might not know how to inflate the ring.
2. Inflating takes lots of time, so much trouble and waste of both time and breath.

1. The inflatable ring's layer is below 0.3mm thickness, inclined to punctures and air leaks therefore it is dangerous.
2. If it is damaged, it cannot be repaired.
3. It always carries the risk of air leak, which is quite dangerous for babies during swimming.
