

6

"Notice elastic ring that holds the ear pad."

STEP 6: Notice the elastic ring that holds the earpad

Notice that the ear pad is mounted on an elastic ring.

This ring need to go under the hooks I previously shown.

7

Push the earpad under the plastic hooks until you hear a clicking sound

STEP 7: Attach The Ear Pads

Take the ear pad and put it under the first hook.

After the first hook the remaining are easy. Follow the ear cup around and push until you hear a click.

The clicking sound means that the ring is securely under the hook.

At the end, just make sure that all of the ring is under all of the hooks.
