

KICKSTAND/PORTRAIT MODE

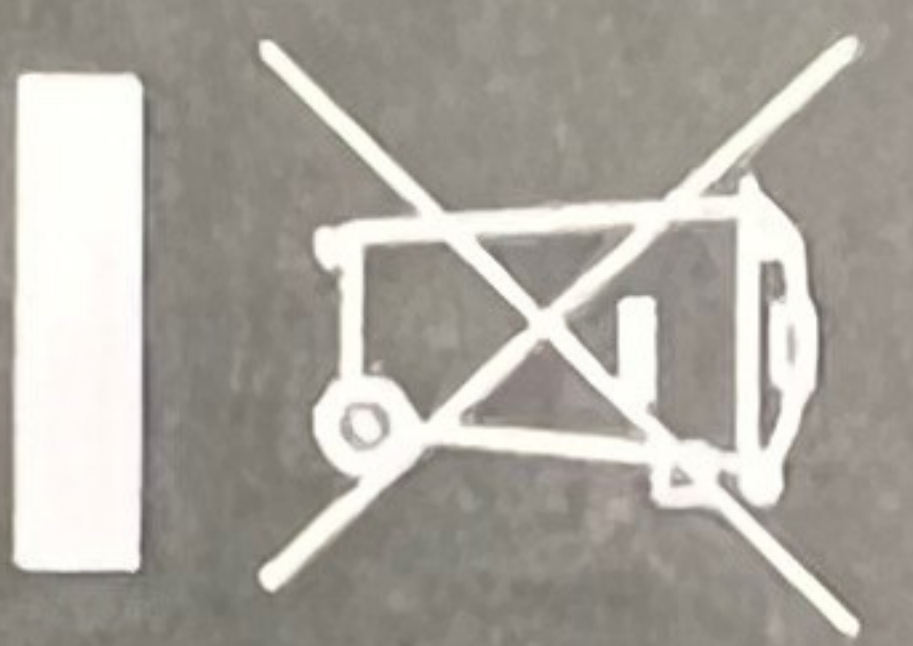

The DUEX PLUS can be used as a standalone device either in portrait mode or kickstand mode with our optional Kickstand. Portrait mode can be great for viewing contracts or programming while Kickstand mode is perfect for when working with tablets and mobile devices.

AUTO-ROTATION

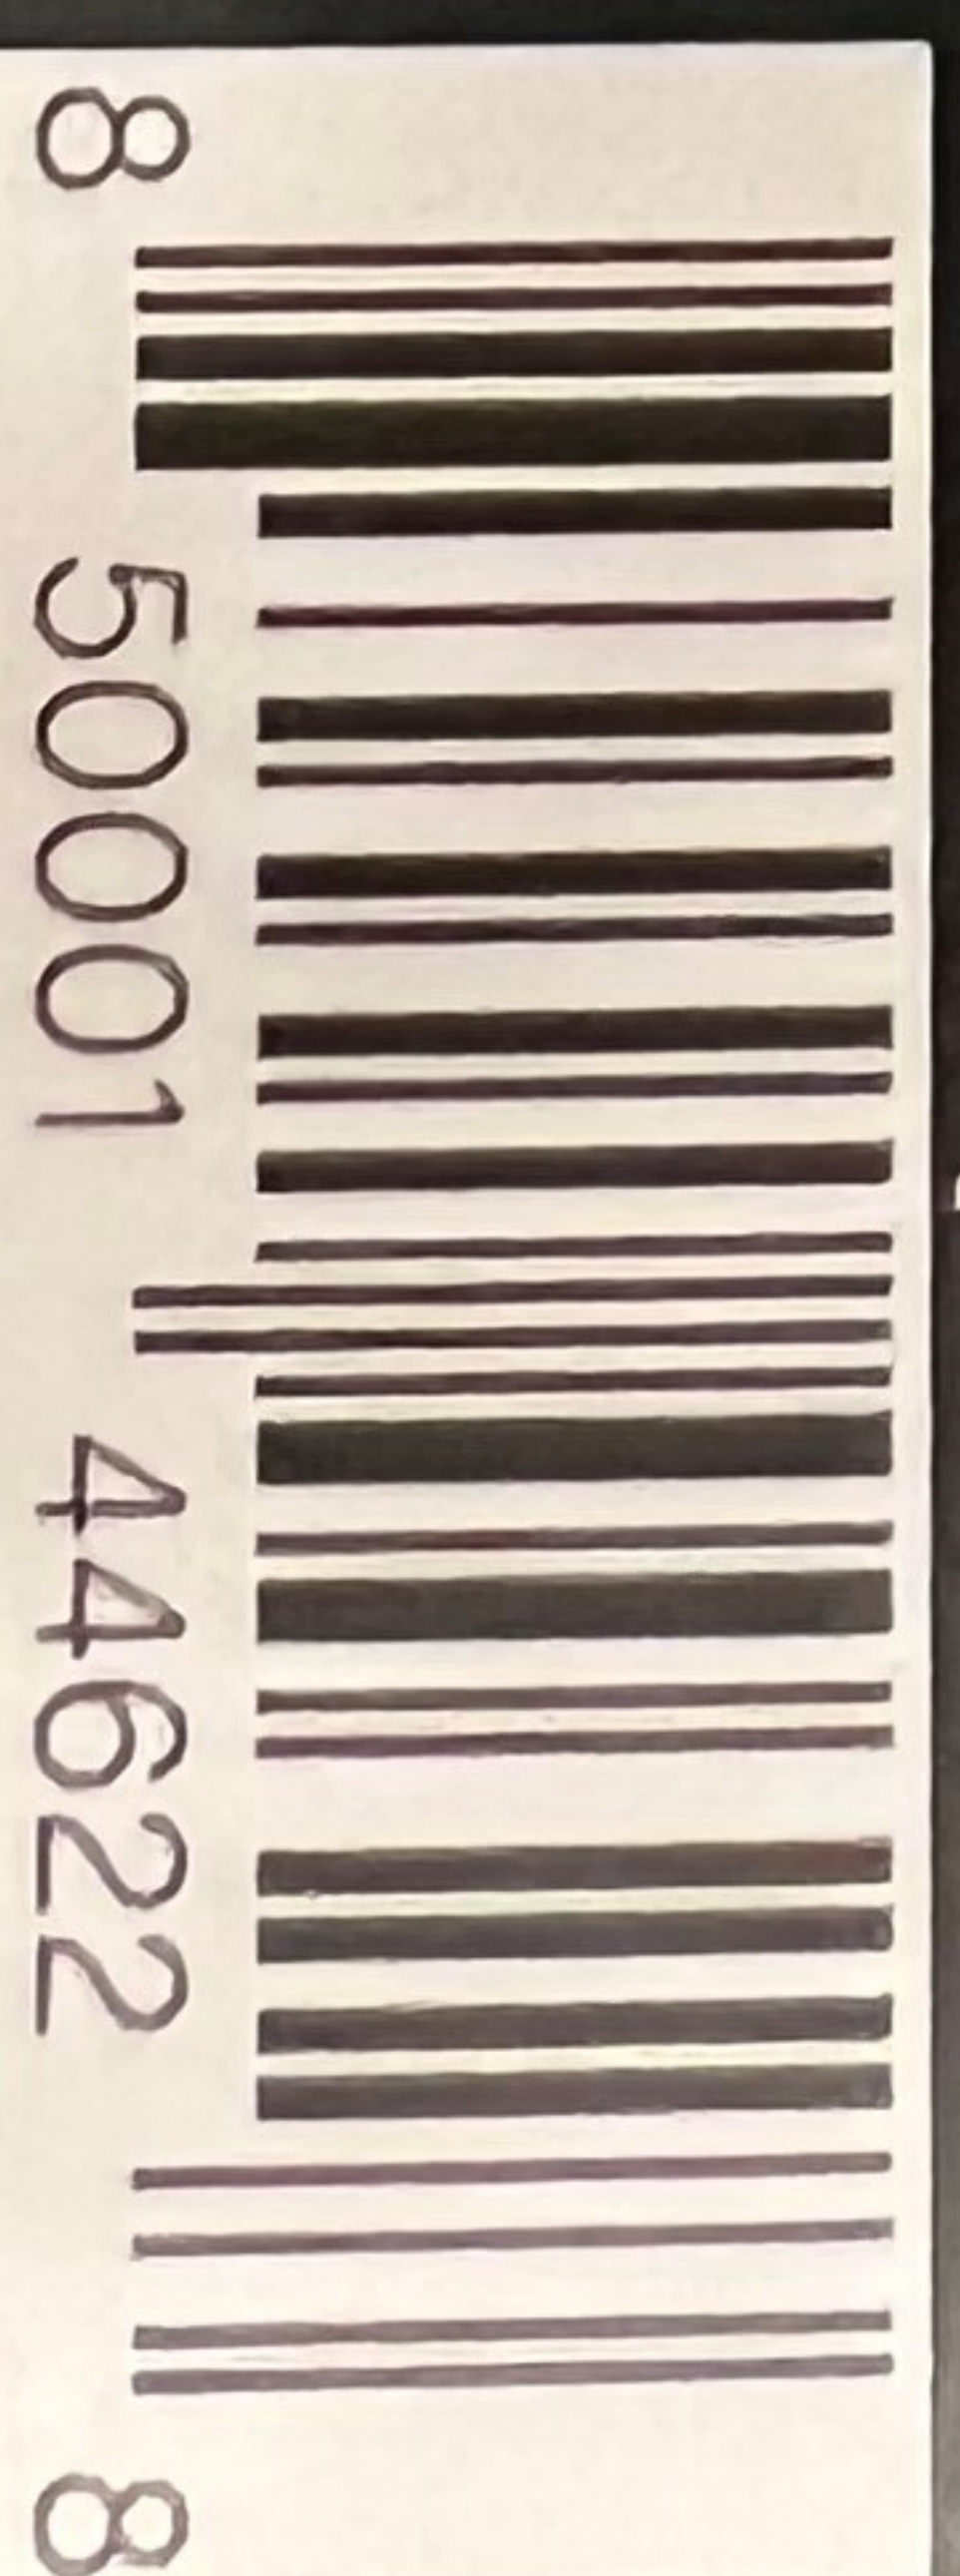

The DUEX PLUS features a gyroscope that will enable the device to quickly auto-rotate when switching from a right-hand orientation to a left-hand orientation. This allows the user to conveniently change their orientation at anytime.

HYBRID SIGNAL

The DUEX PLUS features a hybrid signal that enable the display to work with different devices. For laptops with USB-C, the display is programmed to work with USB-C. For other devices with USB-A, the DUEX PLUS will easily work with our proprietary driver.
