

LED Driver 3color

LOAD: SF(30-50W) x2 100W
OUTPUT: 90-165VDC 280mA ±5%
INPUT: 165-265VAC 50/60HZ
45°C Tc: 65°C

Warm tip

- Please do not hurt the surface layer in periphery of LED patch when installing. Punching holes will otherwise the light source may be damaged.
- At the same time, check whether all line terminal connections are in good contact. Good (because there are connection lines in the process of logistics and transportation falling off, otherwise the lamp body will not be electrified).

LED LIGHTING
Voltage: 165-260V 50-60Hz
IP=20 Ra:80
