

Long-lasting battery Strong and slim body

We put a 6000 mAh large-capacity battery in the slim body. Due to the advanced 12nm process technology and intelligent power-saving technology of the T618, online streaming time reaches 7 hours, and the local video playback reaches an astonishing 10 hours*. Fast-charging USB-C port quickly gets you back during a short break.

iPlay 40H uses an in-mold decorated (IMD) magnesium alloy build in the frame, which makes the tablet firmer and more durable, textured back cover feels too good to put the tablet down.
