-  Whale

For young minds, play is a universal and powerful mode of learning! Explore the world with Magna-Tiles[®] Animal Sets! Match animals to their paw prints and build new and exciting environments.

Did you know?

The word "arctic" comes from the Greek word "arktikos" which means "near the bear".

Penguin

A group of penguins out in the water is called a raft, but on land they're called a waddle.

Polar Bear

Even though it looks white, polar bear fur is actually hollow and transparent. It reflects light similarly to ice which makes it look white or yellow.

Whale

Whales are descended from the Artiodactyl species of dinosaurs, which were land livers.

Seal

Harp seals migrate up to 2,500 km from their breeding sites to summer feeding grounds.

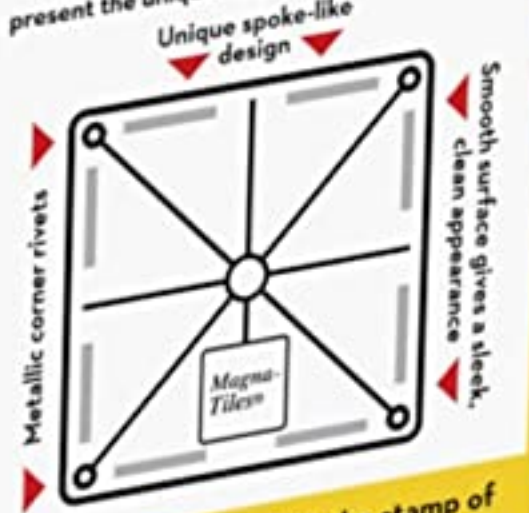

THEY ALWAYS CONNECT!

The secret is the unique ability to attract even when the tiles are flipped!

DON'T SETTLE FOR IMITATIONS!

Look for the following features which present the unique Magna-Tiles[®] appearance:

Both our unique look AND the stamp of Magna-Tiles ensure top quality!
