Show connected devices

### Classic mode

Arbitrary switching of 9 classical  
vibration frequencies

### Musical mode

It can vibrate according to the music  
played by the mobile phone

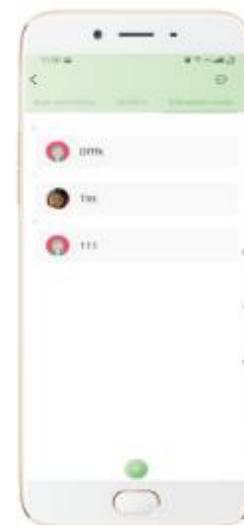

### Draw something

Stroke mode: the minimum vibration  
force is at the middle position, and  
the greater the vibration force is  
at the edge position

### Shake it

Shake the mobile phone toy according  
to the amplitude you change. The  
greater the amplitude, the stronger  
the vibration

### interactive mode

The greater the shaking of the toy in Shanghai,  
the more powerful it needs to be before it can  
interact with her in Beijing. You can video, chat  
and control the device at the same time
