

UNLEASH YOUR INNER MAD SCIENTIST!

The world has fallen into disarray, as Mr. Black and Mr. White engage in all-out biowarfare. Which side will you join? Will you emerge victorious?

The battle between the forces of progress and chaos rages on... Mr. White leads the scientific community, achieving revolutionary breakthroughs in the study of disease and developing new medical technology at a breakneck pace. Mr. Black is a force of nature that drives his agenda of entropy towards mass wipeout via all pathogens (unknown to mankind, with his ultimate mission to infect the world).

Infection Wars is a thrilling game in which you battle your friends and foes by infecting them with various diseases - salmonella, tuberculosis, ebola, SARS CoV-2 & more - while protecting yourself with gene technology, medicine, and a strong immune system. Equip yourself with gas masks and hazard suits. Sneak on your enemies. Steal their organs. Mutate your bioweapons. Cause total mayhem. All this power lies in the palm of your hand.

All you have to do... is take it.

Every player is unique, and so is each card. Develop your own playing style and enjoy countless battles with friends. Each playthrough feels fresh & dynamic, constantly keeping you on your toes. Will you follow in the footsteps of Mr. White... or Mr. Black? The choice is yours...
