

Pop of Color – How to apply the Gel Nail Wraps?

Step 1 – Prep the manicure

Gather all your items in front of you. Prep those nails – shape them, push back the cuticles, and make sure they're oil-free

Tip: Avoid any cremes or oils, 1 hour up to applying the wraps

Step 2 – Select the wraps

Pick the perfect size wrap – go small if unsure! Peel that protective film of the wraps and apply the wrap on the nail

Tip: Choose the gel nail wrap that is slightly smaller than your nail size

Step 3 – Press the wraps

Press on those wraps with the manicure stick or your fingers, and cut off any extra

Tip: Avoid touching the sticky side of the wrap that will be pressed on the nail

Step 4 – Cure the wraps

Blast those gel wraps under a UV/LED lamp for 60 seconds. File away the extras with a gentle touch. Seal the deal with a topcoat and cure it again for 120 seconds

Tip: Hold the file in a horizontal position to prevent chipping

Step 5 – Remove the wrap

Gently slide the wooden stick beneath the edges of the gel polish sticker. Smoothly apply cuticle oil along the sticker's edges. Gradually lift the sticker from the nail

Tip: Avoid removing the gel polish stickers without using cuticle oil

Expert tips

For the best result!

- **Don't apply our Gel Nail Wraps in the sun**
- **Re-apply the Top Coat every 7 days**
- **Press sticker edges firmly before curing**
- **File edges only after curing under the lamp**
- **Carefully file under the nail horizontally**
- **Store our Gel Nail Wraps in their packaging**
- **Never remove without cuticle oil**
