

3. Straight hair

① Wash and dry your hair, comb it thoroughly. Wrap a towel around your neck to prevent possible skin burns.

② Insert the plug into the power socket (power indicator light turns on), long press the power button to activate the Dreambrush.

③ Set the Dreambrush to the right settings according to your type of hair.

④ While heating, the display will show the temperature after the corresponding gear is heated to the set temperature.

⑤ Once the temperature of the settings are reached. Hold the Dreambrush in your hand and make sure you keep a safe distance between the comb and the skin and eyes.

⑥ Split the hair evenly, hold and tighten it from the root of the hair and place the hair strands in the comb teeth.

⑦ Slowly and smoothly pull down from the root to the tip of the hair, repeat the above actions until you have the desired result.

⑧ Once you're done. Press the power button to shut the Dreambrush down. Wait for the brush to cool down before you put it down.

4. Curly Hair use

Warp shape

For the outward curling style, after completing steps 1 to 6 for straight hair, hold the hair with your hands and slowly roll it around the comb. Hold it at the end of the hair for about 3 - 5 seconds.

Inner volume modeling

Shut down

After finishing the modeling, press the power button to shut down. Wait for the Dreambrush to cool down before placing it on the surface.

【 Temperature Settings 】

The default working state of the Dreambrush is the first grade. Press the + key or - key on the Dreambrush to adjust the temperature. Each time a temperature is set, the indicator light will flash. When the temperature has reached the set value, the gear indicator will change from flashing to constant light.

Suggestions for temperature selection

1.2 grade, about 130 °C, suitable for the first use of this straight hair comb, or soft and thin hair.

5.6 grade, about 160 °C / 170 °C, reference hair quality: normal and slightly curly hair.

3.4 grade, about 145 °C, reference hair quality: blonde hair, bleached or dyed hair.

7th grade, about 200 °C, reference hair quality: very thick, curly and thick hair.
