GMDN codes GMDN: 65660; Finger/toe buddy strap, reusable

GMDN Code: 65660; Finger/toe buddy strap

Definition: A flexible preformed device designed to be wrapped around an injured/diseased finger or toe and the adjacent digit to function as a splint-like strap for immobilization of the injured/diseased digit to facilitate healing and/or pain relief. It is made of soft materials and has self-retaining fastening. This is a reusable device.

Intended Purpose: The company specializes in orthoses (also known as splints and braces) for the hand and feet, with a concentration on products designed for persons with arthritis and the resulting deformities caused by inflammatory conditions. All products are designed for ease of use, optimal comfort and for the restoration of hand and foot function. The products are available in a variety of shapes and sizes and may be used for patients in healthcare facilities or at home.
