

Certificate of Module C2 equipment within the scope of Equipment Regulation 1

FPC Certificate No. CE

Certificate holder: Jiangsu Sun Plast Co Ltd, Wuxiang P.R. China
Manufacturer location: No 51, Wuxiang P.R. China
The scope of the certification for: The manufacture of face masks for adults
Validity from: 2025-10-23
Expiry date: 2029-01-20
To: 2024-10-22

CCQS Certification Services Limited is issued as a fourth member of a voluntary FPC in conformity with Europe standard technical for certified entities for Personal Protective equipment under the certificate (class II) in the field of certification for accompanying schedule and for the manufacture of safety equipment to offer our facilities which allow us to provide you with the services for the certificate and the accompanying schedule design for any third party companies for the equipment in the scope.

Approved by Inter-Commissioners as a British Subj. for CE Marking for FPC.

Heating Protective Device Test Report Number QM014 Revision 0

Jiangsu Sun Plastic Products Co Ltd
 No. 11 Wuxiang Road, Wuxiang Town
 Jiangyin, Jiangsu, P.R. China

Date of Report: 5/26/19
 Date of Issuance: 4/28/19-5/13/19
 Date of Sample Receipt: 4/29/19

Alternative measurements have been performed according to the European Standard EN1012:2002 on the Jiangsu Sun Plastic Products Co Ltd SA-1-8 face insert-type hearing protector (see EP QM014). The specified (default) measurement data were obtained using various normally-hearing listeners. These listeners were selected as specified in EN1012:2002.

The measurements were made in a room designed for this purpose. All acoustic characteristics of the room meet the requirements outlined in EN1012:2002. The ambient noise levels in this room are below the limits specified in EN1012:2002, and open ear headsets are used as a controlling factor to minimize the background noise levels. An automatic recording instrument was used to record test signals and calculate earheadset results.

Each of the eleven subjects was tested at each of seven test frequencies. The attached Tables show mean and standard deviation attenuation values in decibels (dB) for each test signal. The results presented in this report pertain to the samples tested only.

Michael & Associates is accredited by the National Institute of Standards and Technology (NIST) National Laboratory Accreditation Program (NVLAP) for tests performed according to ANSI S12.70:2002, ANSI S3.19:2004, ANSI S12.4:2014, ANSI S12.40:2012 and EN1012 parts 1-8. These accreditation criteria encompass the requirements of international standard ISO 17025. This report may only be reproduced or translated electronically or in any manner. This report shall not be used to claim product endorsement by NVLAP or by any agency of the U.S. Government. Accreditation documentation can be viewed at www.nvlap.gov or www.michaelassoc.com/data/documents/NVLAP-2019.pdf.

This data laboratory-derived alternative data for comparison purposes only. The amount of protection afforded is field use is often significantly lower depending on how the protector are fitted and worn.

Kenneth Michael, Ph.D., President
