- lighting modes

CHARACTERISTIC

A flashlight is an indispensable tool for daily emergency needs, taking steps or camping. The product is made of a very durable material, which guarantees the efficiency of the flashlight for a very long time. Moreover, the light bulb is resistant to shock, dust, etc.

BATTERY AND MAINTENANCE INFORMATION

- Keep batteries / accumulators out of the reach of children.
- Do not store batteries / accumulators in easily accessible places, as there is a risk of them being swallowed by children or pets. If swallowed, see a doctor as soon as possible.
- Loading or charging batteries: Accumulators can cause harm if they come into contact with the skin, so always use appropriate protective gloves when handling them.
- Batteries / accumulators must not be short-circuited, dismantled or thrown into fire. There is a risk of an explosion!
- Normal disposable batteries must not be recharged as there is a risk of explosion! Only recharge the batteries intended for this purpose, using the appropriate charger.
- Batteries / rechargeable batteries must always be stored with the correct polarity (plus / - and minus / +).
