

Digital Cordless Telephone

Motorola C1L For C1001L, C1002L, C1003L and C1004L

Charge the handset for 24 hours before use

### IMPORTAN

Warning! Use only the approved rechargeable Ni-MH battery cells (2 x AAA Ni-MH 300mA rechargeable batteries) supplied with your C1L. BATTERY LOW WARNING

If D icon flashes on the display and you hear a warning beep every Ite during a call, you will need to recharge the handset before you can use it aga

When charging, 💷 icon will scroll on the display.

#### BATTERY PERFORMANCE

In ideal conditions, fully charged batteries should give up to 6.5 hours talk time or up to 135 hours standby time on a single charge.<sup>1</sup> Note that new batteries do not reach their full capacity until they have

been put to normal use for several days To keep your batteries in the best condition, leave the handset off the

hase for a few hours at a time

Running the batteries right down at least once a week will help them last as long as possible

The charge capacity of rechargeable batteries will reduce with time as they wear out, giving the handset less talk / standby time. Eventually they will need to be replaced.

After charging your handset for the first time, subsequent charging time is irs a day. Batteries and handset may become wa charging. This is norma

<sup>1</sup>All talk and standby times are approximate and depend on features selected and usage patter

### Date and time

If you have subscribed to a Caller ID Service, the date and time is set automatically for all handsets when you receive your first call

If you do not have a Caller ID service, you can set the date and time , see section "7. Clock & Alarr

Your C1L is now ready for use

If there is no answer from the other handset and you wish to return to your external caller, press Int.

# Your external call resumes automatically after 30 seconds if there is

3 5 4 3-way conference call You can hold a 3-way conference call between 2 internal callers and 1 external caller

### During a call with an external caller:

- 1. Press Int followed by the handset number (1-5) that you want to establish a conference call
- When the other handset answers, press (#) to connect all three callers to begin the conference call. Cart icon is displayed. 3. If there is no answer from the other handset, press Int to return to
- your external calle
- Press to end the call.

#### 3.6 Redial The last 10 entries dialled are stored in the redial list.

### 3.6.1 View or dial an entry

- 1 Press (1) to open the Bedial list
- 2. Scroll  $\blacktriangle$  or  $\checkmark$  to the entry you want.
- 3. Press 🖊 to dial the displayed entry or press 🚊 to return to standby.
- NOTE

If the caller's number exactly matches an entry stored in the phonebook, the name is displayed. Press () to see the caller's number 3.6.2 Copy a Redial list number to the phonebook

### 1. Press () to open the Redial list.

- Scroll ▲ or v to the entry you want.
- Press (MRNU). The display shows ADD?.

# Technical Information

How many telephones can I have? All items of telephone equipment h Now many telephone can i have All items of telephone equipment have a Ringer Equivalence Number (REN), which is used to calculate the number of items which may be connected to any one telephone line. Your C1L has a REN of 1.A total REN of 4 is allowed. If the total REN of 4 is exceeded, the telephones may not ring. With different telephone types, there is no guarantee of ringing even when the REN is less than 4.

Any additional handsets and chargers that you register have a REN of 0. Connecting to a switchboard

This product is intended for use within Europe for connection to the public telephone network.

### Recall

3. Using the phone

You need to place your C1L base within 1.5 metres of the mains power and telephone wall socket so that the cables will reach. The socket-outlet should be installed near the equipment and should be easily accessible

Make sure that it is at least 1 metre away from other electrical appliances to avoid interference. Your C1L works by sending radio signals between the handset and base. The strength of the signal depends on where you place the base. Placing it as high as possible ensures the best signal.

HANDSET RANGE The unit has a range of up to 300 metres outdoors when there is a clear line of sight between the base and handset. Any obstruction between the base and handset will reduce the range significantly. With the base indoors and the handset either indoors or outdoors, the range will normally be up to 50 metres. Thick concrete and stone walls can severely affect the range.

The **Y** icon on your handset indicates that you are within range of the base. When out of range of the base, the **Y** icon flashes. If you are on a

The line will hang up if the handset moves out of range of the base. Move closer to the base. The handset will automatically reconnect to the base.

The base station must be plugged into the mains power at all times. Do not connect the telephone line cord into the wall socket until the handset is fully charged. Use only the power adaptor and telephone line cord

Plug the telephone line cord into the socket marked arLambda on the

11. General information

This equipment is not designed to make emergency telephone calls when the power fails. Alternative arrangements should be made for access to

This product is intended for connection to analogue public switched elephone networks and private switchboards in Europe

#### Important safety instructions

Follow these safety precautions when using your phone to reduce the risk of fire, electric shock, and injury to persons or property:

Keep all slits and openings of the phone unblocked. Do not set the phone on a heating register or over a radiator. Ensure that proper ventilation is provided at the installation site.

Do not use while wet or while standing in wate

seller of the Product; (c) if a warranty card was included in your box, a completed warranty card showing the serial number of the Product; (d) a written description of the problem; and, most importantly; (e) your

caller's number on your handset (provided it is not withheld) prior to answering the call. The display can show the first 12 digits or characters of the phone numbers and names.

If your caller's name and number are stored in the phonebook and a number match is found, you will see the caller's name on the display instead.

#### 8.2 Calls list

The Calls list stores details of your last 40 received calls, including the phone number and date and time of the call.

The Calls list also alerts you when you have unanswered calls.

The caller's details are stored in the Calls list whether or not you have answered the call. The list is shared by all handsets registered to the base. When the list is full, and a new call is received, the oldest entry will be

When a new call is received in the Calls list, 🕿 icon will flash on the display in standby mode to alert you. When you have viewed the new call, ☎ icon disappears but ↓ icon will remain.

### 8.2.1 View the Calls list

- 1. Press  $\sqrt[6]{}$  to open the Calls list. If there are no calls in the list, the display shows FMPTY
- 2. Press  $\blacktriangle$  or  $\checkmark$  to scroll through the list.
  - If the call was answered, to is displayed as you scroll to the entry. If the call was unanswered, con is displayed as you scroll to the entry. When you reach the end of the list, the handset
- f the caller's number exactly matches an entry stored in the phonebook, the display will alternate between the name and the number. Press 🐨 to see the caller's number.
- If the telephone number is longer than 12 digits, displayed. Press (MENU) to see the remaining digits.
- Press (MRW) again to see the time and date of the call.
- Press (MENU) again to access the option to store the entry in your
- Do not use this product near water (for example, near a bath tub, kitchen sink, or swimming pool).
- Do not allow anything to rest on the power cord. Place the power cord so that it will not be walked on.
- Never insert objects of any kind into the product vents as that may result in fire or electric shock.
- Unplug this product from the wall outlet before cleaning. Do not use iquid cleaners or aerosol cleaners. Use a damp cloth for clea
- Do not disassemble this product. If service or repair work is required, contact the customer service helpline found in this user's Guide. Do not overload wall outlets and extension cords.
- Avoid using during an electrical storm. Use a surge protector to protect the equipment.
- Do not use this phone to report a gas leak, especially if you are in the icinity of the gas line

#### IMPORTANT

To reduce the risk of fire, use only the supplied power adaptor.

### Unplug this cordless phone immediately from an outlet if

- The power cord or plug is damaged or fraved.
- Liquid has been spilled on the product.
- The product has been exposed to rain or water. Do not retrieve the handset or base until after you have unplugged the power and phone from the wall. Then retrieve the unit by the unplugged cords.
- The product has been dropped or the cabinet has been damaged. The product exhibits a distinct change in performance.

#### Installation Guidelines

- Read and understand all instructions and save them for future eference.
- Follow all warnings and instructions marked on the product
- Do not install this product near a bath tub, sink, or shower.
- Operate this photo using only the power source that is indicated on the marking label. If you are unsure of the power supply to your home, consult with your dealer or local power company.
- Do not place this product on an unstable cart, stand, or table. This product may fall, causing serious damage to the product. Adjust only those controls that are covered by the operating
- nstructions. Improper adjustment of other controls may result in
