

UNIVERSAL CELL PHONE CASE INSTRUCTIONS FOR USE

1. Remove the Cell Phone Case from packaging and verify that your cell phone will fit within the case.
2. Place any combination of the included metal adhesives (1 large & 2 small) on the back of your phone or slim phone case (this method is recommended).
3. Before bringing your cell phone up to your head or ear, flip the shielded front cover closed over the screen.
4. Speak on the phone as you normally would. Voice and sound quality will not be affected since the microphone is unobstructed on the bottom of your phone and a small opening over the ear speaker allows you to hear perfectly.
5. If you put your phone in your pocket, purse or bag, keep the shielded front cover closed and facing towards your body.
6. To use your phone's camera lens, remove the phone from inside the wallet case.
